TECHNICAL NOTES 32

GLOSSARY 33

Food Stamp Utilization
Fiscal Year 1980

The purpose of the Food Stamp Program is the alleviation of hunger and chronic malnutrition for persons in those Minnesota households having low incomes. It encourages better nutrition by providing needy families with food coupons which are convertible at local retail establishments for eligible items.

During fiscal year 1980, food stamp utilization increased 18.5% over the previous year. This increase occurred in both the Public Assistance (PA) and Non-Public Assistance (NPA) categories. The Non-Public Assistance category, once the smaller component has now become the major element within the program.

Recipient totals are now the highest recorded since April, 1976. Early 1976 was also a period of high joblessness with unemployment averaging 7.4% for the first quarter of the year. The reasons currently given by the counties for the persistent increases include migrant families in need, job layoffs, and strikes.

Food stamp expenditures are now approaching $6,000,000 per month. These totals have not been seen since 1978 before the Food Stamp Act of 1977 was implemented and purchase requirements were abandoned. June's expenditure was $5,847,566, an increase of $388,304 (7.1%) from May and $1,926,291 (49.1%) above June, 1979.

The findings of a recent survey of food stamp cases should be introduced. This survey, one aspect of the food stamp quality control case review process utilized a random sample of households participating in the Food Stamp Program between October, 1979 and March, 1980. Its findings indicate that public assistance households are typically larger than their non-PA counterparts. However, the size of AFDC families, the largest PA category, is equivalent to the size of those needy families not receiving any kind of assistance. Another point of interest is that the majority of the cases sampled (55.7%) received food stamps less than 12 months. Yet, 30.5% were noted to have had enrollment for over two years. Also, less than one-quarter of food stamp households were found owning or buying a home. The majority, 70.3%, were renting shelter. These findings are shown in the three tables which follow. Tables 4 and 5 show the 24-month trend in food stamp utilization during fiscal years 1979 and 1980. Also included is a graph displaying the monthly activity of the two food stamp recipient categories in fiscal years 1979 and 1980.

TABLE 1

Food Stamp Households by Available Resources

Resources	Percent of All Households	Percent of All Food Stamp Recipients	Recipients per Household	Percent of Total Food Stamp Bonus Received	Bonus per Household
PA Cases*:	51.4%	57.1%	2.9	54.4%	$ 81.46
AFDC	42.4%	52.5%	3.3	46.7%	$ 84.70
GA	8.7%	4.2%	1.3	7.4%	$ 65.35
AFDC and GA mixed	0.3%	0.4%	4.0	0.3%	$ 93.33
Non-PA Cases**:	48.6%	42.9%	2.3	45.6%	$ 72.28
SSI only	3.8%	1.5%	1.1	1.7%	$ 34.53
RSDI only	10.4%	6.8%	1.7	5.6%	$ 41.30
MSA only	0.7%	0.3%	1.0	0.4%	$ 36.88
Mixed SSI, RSDI, MSA	8.7%	3.8%	1.2	3.4%	$ 30.39
No SSI, RSDI, or MSA	25.0%	30.5%	3.2	34.5%	$106.54

*Can include SSI, RSDI, MSA, and other assistance
**No AFDC or GA

TABLE 2

Duration of Food Stamp Utilization

Food Stamp case life is the total time the case has received food stamps (even if not continuous).

Case Life	Percent of Cases
New application	12.5%
1 - 6 months	25.4%
7 - 12 months	17.8%
13 - 24 months	13.8%
Over two years	30.5%
Median	11.1 months

TABLE 3

Food Stamp Households by Type of Shelter

Shelter Type	Percent of Households
Own or buying home	23.8%
Renting, private	55.3%
Renting, public	15.0%
Own or buying mobile home	3.3%
Other	2.6%

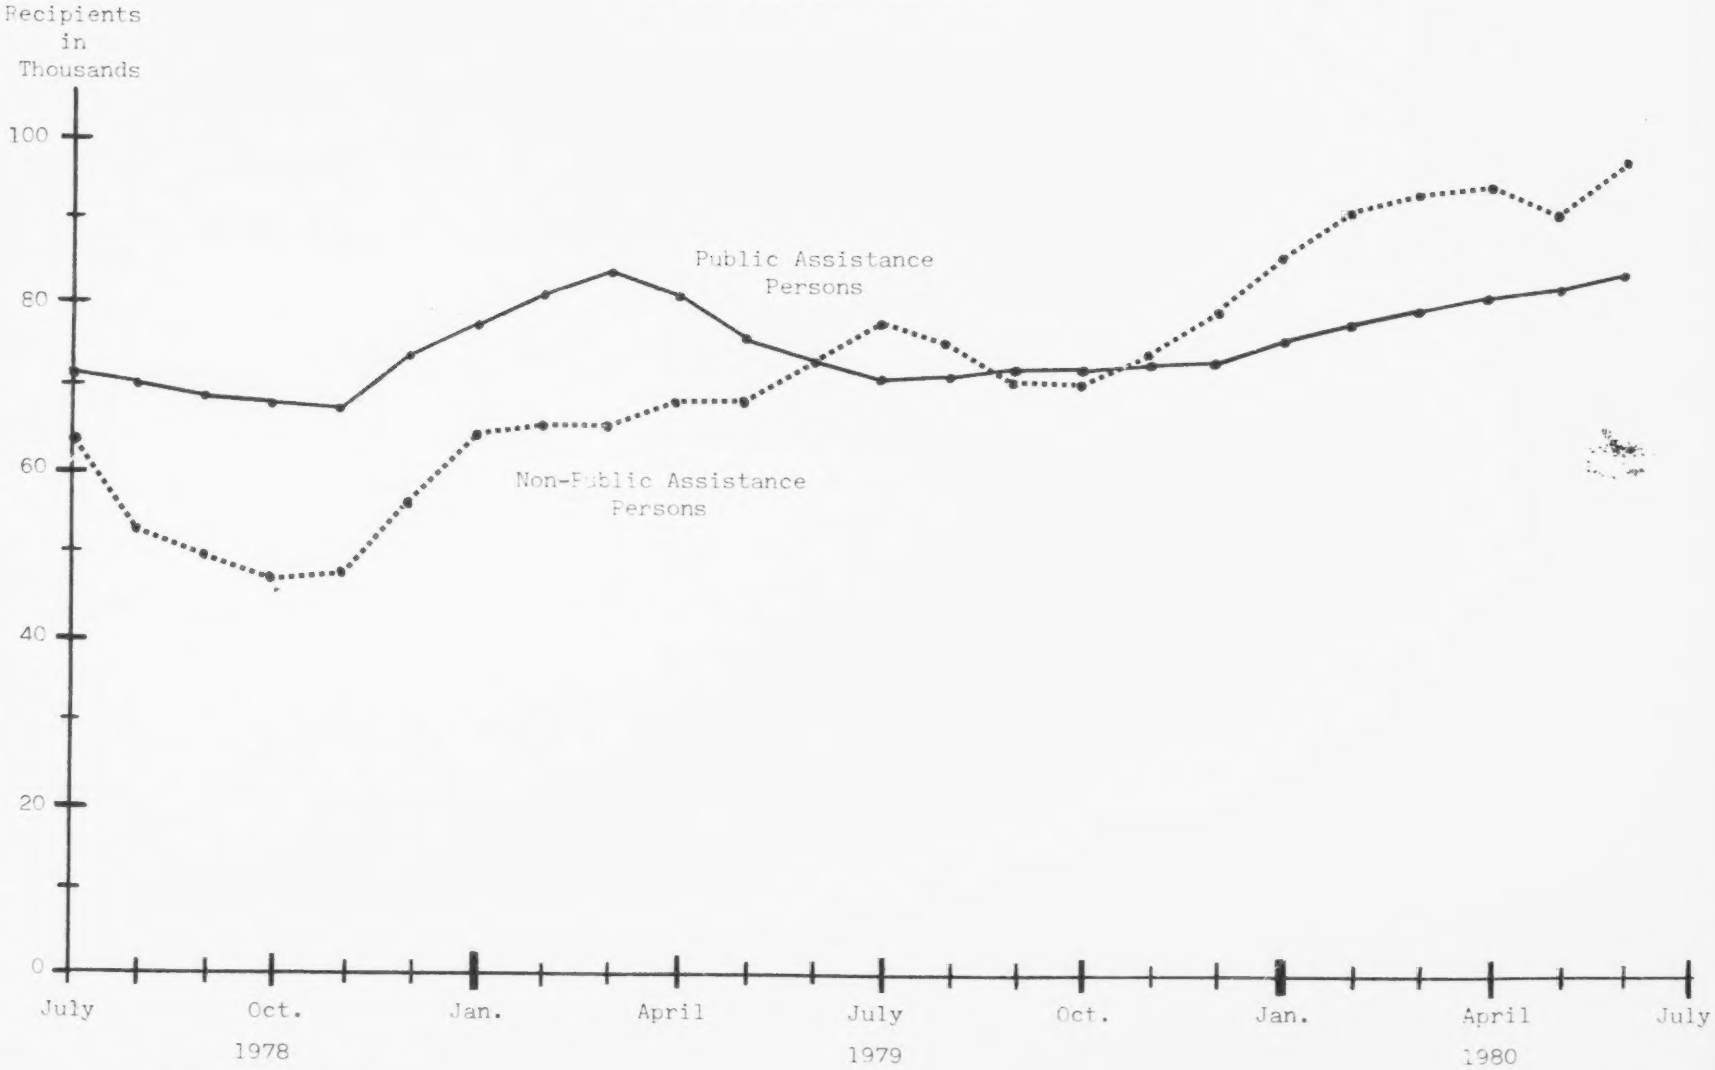
Food Stamp Recipient Growth
Fiscal Years 1979 and 1980



July, 1980 - In Summary

All Programs - Persons aided in July, 1980 totalled 213,540, a record for a July month. This total is 15,359 above the same month in 1979 and 9,874 above July, 1975. The AFDC Program accounts for most of the annual trend and the five-year trend. The five-year trend by program is noted in the following table:

Program	Persons Aided	Change from July, 1975 #	Change from July, 1975 %
AFDC	138,759	+13,806	+11.0%
EA	5,835	- 3,502	-37.5%
MSA	10,460	+ 355	+ 3.5%
GA	14,646	- 3,305	-18.4%
MA	118,456	+10,508	+ 9.7%
Total (Unduplicated)	213,540	+ 9,874	+ 4.8%

July public assistance payments of $71,731,931 declined from June by $4,326,295 (-5.7%) as a result of lower medical costs for AFDC and disabled recipients. Compared to a year ago, July costs were $10,814,220 (+17.8%) higher, and to five years ago $36,730,677 (+104.9%) higher. Health care costs dominate this trend.

Aid to Families with Dependent Children (AFDC) - Net maintenance expenditures rose to $16,684,257, an increase of $1,786,468 (12.0%) above June, 1980, and was $2,410,457 (16.9%) higher than in July, 1979. An increase was foreseen since basic payment standards increased 7.0%, effective July 1. This was accompanied by a rise in cases receiving payment of 806 (1.6%) from the previous month and 3,769 (7.9%) from July one year ago. Also, a reduction of $310,121 in IV-D collections in July contributed to higher costs. The effect of these factors on payments per case caused the average grant to rise from $295.15 in June, 1980 to $325.35 in July, an increase of $30.20 (10.2%).

Percentage-wise, the unemployed parent segment displayed the most rapid rate of increase, rising 21.4% in expenditures and 13.9% in cases compared with June, 1980. In the one-year period from July, 1979 to the present, cases within this segment increased 120.0%. It is apparent that the economic recession is playing a predominant role in the fast expansion of the unemployed parent segment. This factor is substantiated by observing this segment's reasons for openings in July, 1980, whereby 521 cases, or 75.7% of the total, were approved as a result of loss or reduction of employment of the responsible or supporting household member. The other unemployed parent approvals were due to loss or reduction in unearned or other income or in resources (18.8%), and the remaining 5.5% was the clients' return of the eligibility review or the fulfillment of other program requirements. The regular segment increased by 1.2% or 548 cases. With the regular segment, the major problem leading to the need for assistance is support being terminated or reduced due to the continued absence of a supporting household member. The foster care and unborn segments remained relatively stable.

Applications approved totalled 4,086, rising by 904 (28.4%) cases beyond June, 1980 and 1,253 (44.2%) greater than the approvals for July, 1979. In the current reporting month, reopened cases comprised 44.4% of total approvals, whereas, in June, 1980 and July, 1979, such cases equalled 47.4% and 46.1% respectively. There were 4,616 applications received in July, up 1,114 (31.8%) from June and 1,555 (50.8%) from July one year ago. Cases denied totalled 376, up 91 (31.9%). Excess income was the factor in 27.4% of the denials and eligibility was not determined in 44.7% of the cases denied as a result of not cooperating, unable to locate applicant, applicant failing to respond and by applicant's request. This month's denials were 71.7% greater than in July, 1979. Closings totalled 2,898, only 66 (2.3%) higher than in the previous month. Eligibility was not determined in 1,102 (38.0%) of the closings due to not locating recipient, the recipients failing to respond, refusal to furnish current information, and the closing of the case at recipient's request. Increased earnings of father or mother closed 224 (7.7%) of the cases. Closings were up 14.5% from July, 1979. For every case closed, there were 1.41 cases opened in July, 1980.

Emergency Assistance (EA) - Payments in July were $440,506. This is $69,462 (18.7%) above June, 1980, and $123,778 (39.1%) over July, 1979. Compared with June, 1980, the bulk of the increase (98.5%) occurred within the SMSA counties, with the three urban counties of Hennepin, Ramsey and St. Louis representing $66,173 (95.3%) of the additional costs. Expenditures rose 56.0% for Ramsey, 31.8% for St. Louis and 9.4% for Hennepin. Ramsey County reported major cost increases in utilities of $22,322 (+110.0%) and in the "Other" category of $31,828 (+63.7%). A large portion of the "Other" category is attributed to Ramsey County and was for furniture and appliances. Hennepin County recorded significant jumps in utilities of $30,079 (+326.3%) and evictions of $17,588 (+32.3%), whereas St. Louis County expended greater amounts for unemployment, up $2,969 (+457.5%) and for "Other" up $3,189 (+39.9%).

The most frequent emergencies during the month were utilities, evictions, unemployment and migrant families. Together, these categories represented 67.2% of the total expenditures for July.

Total cases receiving assistance in July were 1,707, an increase of 263 (18.2%) from June and 421 (32.7%) greater than July one year ago. The entire case increase, with the exception of two cases, fell to the SMSA counties with the three urban counties containing 90.1% of the additional cases.

Medical Assistance (MA) - Payments for July totalled $51,682,932 and 118,456 recipients, an average of $436.30. The expenditure reflected a decrease of $6,271,641 (10.8%) from the previous month and an increase of $7,665,690 (17.4%) from one year ago. The recipient count reflected a decrease of 23,138 (16.3%) from the previous month and a decrease of 4,112 (3.4%) from one year ago. The comparisons, however, take into account that three warrant cycles were processed during June, 1980 and July, 1979, while only two were processed for payment during July, 1980. Furthermore, no regular institutional payments were processed for payment during July, 1979, whereas in June and July, 1980, institutional payments of $5,876,043 and 4,969,122 respectively were processed and issued.

Claims processed for payments during July, 1980 numbered 592,177 new claims and 141,593 old claims, which were carried over from June, 1980. Therefore, 733,770 total claims were processed, of which 543,248 were paid. As a result, each claim that was paid averaged $95.14. Claims that were rejected numbered

51,800 and claims held in suspension numbered 138,722. A breakdown of the total number of claims handled during the month is provided in the following table according to selected invoice types and whether or not they are new or old:

	MA Claims for July, 1980		
Invoice Type	New	Carried Over From Previous Month	Total
Physician	119,732	75,266	194,998
Dentist	19,681	9,252	28,933
Nursing Home	95,718	0	95,718
Inpatient Hospital	8,661	1,958	10,619
Outpatient Hospital	31,193	2,954	34,147
Pharmacy	292,482	37,647	330,129*
Vision Care	4,892	3,549	8,441
Other	19,818	10,967	30,785
Total	592,177	141,593	733,770

*Reflects line items

There were 61,903 recipients that utilized prescribed drugs during July, 1980, followed by physician services with 54,471 recipients. Outpatient hospital services was third with 18,553 recipients, skilled nursing home care was fourth with 15,895 recipients and dental care was fifth with 15,111. Even though 52.2% of the recipients utilized prescribed drugs, it accounted for only 3.4% of the total MA expenditure. The physician services accounted for 46.0% of the total recipients and 5.1% of the total expenditure.

Minnesota Supplemental Aid (MSA) - In July, 10,460 persons received payment under this program. This was 133 (1.3%) fewer than June and 387 (3.6%) below July, 1979. Expenditures by contrast advanced and reached $932,038 during the month, $46,575 (5.3%) more than June and $141,881 (18.0%) above one year ago.

The average grant totalled $89.10. This is a record high and is $5.51 (6.6%) more than June and $16.25 (22.3%) greater than July, 1979.

The July expenditure total was not influenced by fewer refunds and cancellations. On the contrary, these adjustments, totalling $88,970.23, were actually $12,093.15 (15.7%) higher than June.

Higher costs can be attributed to the Blind and Disabled categories, whose payments advanced $718 (5.3%) and $59,829 (9.3%) between June and July. Hennepin County was responsible for 93.2% of the increase within the Disabled category as a result of nursing home rate increases.

General Assistance (GA) - Several legislative changes became effective July 1, 1980, and these changes should show their effects in increased GA payments. The changes were as follows: (1) The state needs standards were raised by 7%. Payments by counties with greater than state standards might not be affected by this, but counties using the state standard will be paying more if recipients' needs are sufficiently great. (2) The legislation stimulates the use of

Emergency GA by requiring that local agencies advise clients about the program. (3) Grants, other than the initial one, must now be paid as of the first of each month rather than more frequently. In some instances, this might have the effect of increased grants, but at least in Hennepin County, July partial grants were forsaken in lieu of first-of-the-month grants for August. This decreased the July grants, but it should have the effect of increasing the August grants. (4) Income deductions were increased for income from roomers and boarders, and for upkeep and repairs on rental property.

The total number of persons receiving GA for July, 1980 was 14,644. This was 124 (0.9%) more than June, 1980, and 2,871 (24.4%) more than July, 1979. The average grant (gross dollars) per person for July, 1980, was $136.04. This was $1.79 (1.3%) more than June, 1980 and $6.95 (5.4%) more than July, 1979.

Since the state standards increased by 7% effective July 1, 1980, a corresponding increase in the average grant for July might have been expected. However, no uniform increase in the average grant occurred. This is because there were other changes concurrent with the increased standard, and because local agencies independently establish their own standards at or above the state standards. The average grant per case increased by 1.2% from June to July. This change for subdivisions of the state are -0.3% for urban, +2.9% for suburban, and +3.0% for non-SMSA. Hennepin County's change to first-of-the-month grants caused a reported 6.4% decrease in the average grant per case for that county and also caused the low urban and state figures.

Application activity increased compared to June. The number of applications received was 7.9% higher and the total applications on hand increased by 8.1%. The number of applications disposed of increased by 7.0% to 5,096. Of these, 4,605 (90.4%) were approved.

The 4,605 cases added in July brought the total cases eligible to 15,379. This was an increase of 3.4% compared to June. Payments were made for 11,843 (77.0%) of the eligible cases. There were 4,113 cases closed which left 11,266 eligible cases continued to August.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $17,533 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

GLOSSARY 32

AFDC Unemployed Parents

During fiscal year 1980, the Unemployed Parent category of AFDC grew rapidly. The advances were triggered by the deepening recession and its associated manifestations--diminished economic activity, layoffs and higher unemployment.

The Unemployed Parent category for the first five months of fiscal year 1980 displayed little change from the previous year although it could be observed that the rural counties were experiencing a considerable increase. This changed abruptly in December when the unemployment rate rose 20% from 4.1% to 4.9%. The subsequent months witnessed a progression of increases which have continued through August. The tables below show the change in the Unemployed Parent category between the first and second halves of fiscal years 1980 and 1979 and then compares these two fiscal years.

Change in AFDC Unemployed Parent Cases
by Area Semiannually During Fiscal Year 1980

Type of County	July to December	January to June	Change #	Change %
Urban*	4,516	5,883	1,367	30.3%
Suburban**	1,667	2,654	987	59.2%
Rural***	1,832	3,979	2,147	117.2%
	8,015	12,516	4,501	56.2%

Change in AFDC Unemployed Parent Cases
by Area Semiannually During Fiscal Year 1979

Type of County	July to December	January to June	Change #	Change %
Urban*	4,389	4,571	182	4.1%
Suburban**	1,548	1,742	194	12.5%
Rural***	1,306	2,036	730	55.9%
	7,243	8,349	1,106	15.3%

Growth in AFDC Unemployed Parent Cases
by Area Between Fiscal Year 1980 and 1979

Type of County	Fiscal Year 1980	Fiscal Year 1979	Change #	Change %
Urban*	10,399	8,960	1,439	16.1%
Suburban**	4,321	3.290	1,031	31.3%
Rural***	5,811	3,342	2,469	73.9%
	20,531	15,592	4,939	31.7%

From these tables, it can be seen that the greatest growth is occurring in the rural counties. The growth in the rural county Unemployed Parent case load is double that of the suburban counties and is four times that of the urban counties. In numbers of Unemployed Parent cases, the rural counties now rank second, having surpassed the suburban counties in the second half of fiscal year 1979.

The rural counties contain 35.5% of the state's population. Only the urban counties, with 39.2%, surpass it. The tables and graphs which follow show the population breakdown by area, compares the Unemployed Parent case and payment change between August, 1980 and 1979, and shows the growth of the county categories from January, 1979 to the present.

Minnesota Population
by Type of County
1979

Type of County	1979 Population	Percent
Urban*	1,591,600	39.2%
Suburban**	1,025,100	25.3%
Rural***	1,443,300	35.5%
Total State	4,060,000	100.0%

Unemployed Parent Cases and Payments by County Type
August, 1980 and 1979 Compared

Type of County	CASES				PAYMENTS			
	August		Change		August		Change	
	1980	1979	#	%	1980	1979	#	%
Urban*	1,299	734	565	(77.0%)	$ 554,981	$289,979	$265,002	(91.4%)
Suburban**	692	271	421	(155.4%)	$ 331,114	$119,852	$211,262	(176.3%)
Rural***	1,076	304	772	(253.9%)	$ 477,538	$130,748	$346,790	(265.2%)
Total	3,067	1,309	1,758	(134.3%)	$1,363,633	$540,579	$823,054	(152.3%)

*Urban - Hennepin, Ramsey and St. Louis Counties.

**Suburban - Anoka, Benton, Carver, Chisago, Clay, Dakota, Olmsted, Polk, Scott, Sherburne, Stearns, Washington and Wright Counties.

***Rural - All remaining counties.

August, 1980 - In Summary

All Programs - Persons aided in August continued the upward trend begun in the fall of 1979. The August total was 221,533, a record high, 7,993 (+3.7%) above July, 1980 and 21,673 (+10.8%) above August, 1979. The monthly trend occurred in AFDC (+3,411 persons), MA (+3,344 persons) and GA (+1,429 persons), while the annual trend shows AFDC with the largest increase of 13,113, MA up 5,826, and GA 3,229. Unemployment is the major factor in the monthly and annual trend. The annual trend in MA is distorted by the fact that in August, 1979, no payments were made for residents in the state institutions.

Expenditures in August, 1980 were $72,088,594, of which 70.9% was for health care and 29.1% for maintenance care. The monthly trend shows a slight relative increase (+0.5%) as lower hospital and nursing home payments partially offset the increase in maintenance costs for the higher case load. The annual trend shows a 30.2% increase of $16,738,691, primarily for higher nursing home costs. Again, this trend is distorted somewhat by the situation wherein no payments were made for residents in the state institutions in August, 1979.

Aid to Families with Dependent Children (AFDC) - Expenditures rose to an unprecedented high of $17,257,441, increasing by $573,185 (3.4%) above July, 1980, and by $2,977,321 (20.8%) over August, 1979. Significant factors contributing to higher costs over the last 12 months are an increase in cases receiving payment and the 7% increase in the basic standard effective July 1, 1980. Support collections remained relatively stable, rising by only $28,948 from August, 1979, thereby exerting little effect upon increased costs. Payment cases were up 1,024 (2.0%) from last month and a plus 4,620 (9.7%) from August one year ago. The fast-climbing case load is indicative of the depressed economy; for example, 80.8% of the total approvals were the result of loss of employment or the reduction of income. Reasons for the remaining approvals were illness, reduction in unearned income, increased medical needs, gaining state residency and reopening cases due to client returning eligibility review.

The Unemployed Parent category continues to display rapid growth (note feature article). In August, there were 3,067 unemployed parent cases. This is 297 (10.7%) more than July and 1,758 (134.3%) above one year ago.

Approvals totalled 3,871, a drop of 215 (5.3%) below July, but 598 (18.3%) higher than in August one year ago. Reopened cases represented 45.2% of the openings in August, 1980 and 41.8% of such cases in August, 1979. Reportedly, reopened cases constitute 47.6% and 39.7% respectively of the total approvals for the SMSA and rural counties.

Closings totalled 3,227. For every case closed, there were 1.20 cases opened. Only 428 (13.3%) of the cases were closed due to earned or unearned income exceeding standards for eligibility. Other reasons for closings were refusing to comply - 708 (21.9%), at request of recipient or other person - 367 (11.4%), unable to determine eligibility due to not locating client or client failing to respond to agency's contact - 106 (3.3%), death of caretaker or only child - 10 (0.3%), excess real or personal property - 28 (0.9%), meets income standard but other eligibility factors not met - 1,580 (48.9%).

Denials fell slightly, to 366, a decline of 10 (2.7%) below July, 1980, and 43 (13.3%) higher than reported for August, 1979. Denials represented 8.6% of the total applications disposed of in the current month compared with 9.0% in August one year ago. Excess income or resources accounted for 102 (27.9%) of the total denials. Other reasons for denials were application withdrawn, unable to locate or applicant failing to respond or cooperate - 160 (43.7%), and applicant meets income standard but other eligibility factors not met - 104 (28.4%).

Emergency Assistance (EA) - Payments for Emergency Assistance fell to $393,260 or $49,746 (11.3%) under the cost for July, 1980. The payment decline was the result of 94 (5.5%) fewer families using the program. The AFDC families were responsible for the major portion of the decline both in terms of cases and payments. Expenditures for AFDC families were $41,024 less, whereas the costs for families other than AFDC dropped only $6,222. The SMSA counties experienced the brunt of the decline with expenditures decreasing $44,959 (12.3%) and cases down 108 (7.6%). In comparison, the rural counties expended $2,287 (3.1%) fewer dollars and paid 14 (4.8%) more families. The annual payment trend shows only a mild increase.

August, 1980 payments differed by only $7,201 (1.9%) from August, 1979. However, cases receiving payment in August, 1980 were 127 (8.5%) higher than recorded one year ago.

The three emergencies of eviction, utilities and unemployment represented $262,062 (66.6%) of the total costs with eviction from shelter being the most prevalent emergency. Eviction increased in both SMSA (+7.3%) and rural (+43.5%) counties in August, 1980. Compared with July, 1980, declines were registered in utilities totalling $20,255 (15.2%), unemployment $5,967 (16.6%), migrant family $9,708 (50.5%), and in the "Other" category down $22,440 (18.4%). The types of emergencies reported for "Other" include battered women, lost or stolen cash or checks, furniture, appliances, housing repairs, food, rent, and moving expenses.

Minnesota Supplemental Aid (MSA) - In August, 10,394 persons received payment under this program. This was 66 (0.6%) fewer than July and 369 (3.4%) below August, 1979. Expenditures also declined during the month by $41,679 (4.5%) to $890,359. This decline is attributable to Hennepin County, whose August payment level was $42,343.58 below July. Last month, Hennepin County retroactively adjusted payments primarily for the disabled in board and care facilities. It appears that their payment level now reflects the current cost of care provided to these recipients. Payment levels in the other large counties were relatively stable between July and August.

Medical Assistance (MA) - MA expenditures for August totalled $51,097,004 for 128,541 recipients. Expenditures were down $585,928 (1.1%) from July as a result of lower hospital and skilled nursing home costs. The recipient count increased by 10,085 (8.5%) from July, the trend occurring in physician services and prescribed drugs primarily for AFDC recipients.

The number of recipients eligible for MA increased to 218,239 for August, continuing a general rising trend over the past year. During fiscal year 1980, the average monthly eligibles numbered 205,434 recipients. The AFDC category reflected most of the increase, followed by the Aged - Medical Only category. Percentagewise, the AFDC/Related category shows the largest increase at 23.3%. The following table compares the number of eligible recipients for fiscal year 1980 to the August, 1980 eligibles for each eligibility category:

Comparison of MA Eligible Recipients

	F.Y. 1980 Average Month	August, 1980	Change	%
Aged - SSI	11,726	11,359	- 367	(- 3.1%)
Blind - SSI	404	397	- 7	(- 1.7%)
Disabled - SSI	15,519	15,508	- 11	(- 0.1%)
AFDC	134,281	144,487	+10,206	(+ 7.6%)
Aged - Medical Only	25,650	27,085	+ 1,435	(+ 5.6%)
Blind - Medical Only	129	138	+ 9	(+ 7.0%)
Disabled - Medical Only	7,618	8,025	+ 407	(+ 5.3%)
AFDC - Related	1,728	2,131	+ 403	(+23.3%)
Needy Children	8,379	9,109	+ 730	(+ 8.7%)
Total	205,434	218,239	+12,805	(+ 6.2%)

The annual trend in expenditures shows a $12,820,475 (+33.5%) increase, about half representing nursing home costs, and the other half state institution payments. No state institution payments were made in August, 1979. The annual trend in recipients shows a 15,172 (+13.4%) increase, 8,691 representing AFDC recipients, 2,935 aged recipients, 2,393 disabled recipients, 422 AFDC/related recipients, and 733 needy children.

General Assistance (GA) - The total number of persons receiving GA for August, 1980 was 16,073. This was 1,429 (9.8%) more than July, 1980 and 3,229 (25.1%) more than August, 1979. The average grant (gross dollars) per person for August, 1980 was $152.46. This was $16.42 (12.1%) more than July, 1980 and $24.79 (19.4%) more than August, 1979.

The change in the statewide average grant per case from June to August shows more clearly the impact of the 7% increase in the state GA standards. This impact was obscured for the June to July change due to the changeover to first-of-the-month grants in Hennepin County. (Hennepin County's average grant changed from $131.94 for June to $123.51 for July to $165.94 for August.) The impact of the increased standards may be noticed in the change in the statewide average grant from $152.07 for June to $171.35 for August. The three urban county average changed from $145.16 to $168.77 for these months.

Redwood and Fillmore Counties have unusually high average payments per person this month because payments were made for battered women's shelter care.

Application activity decreased compared to July. The number of applications received was 12.3% lower and the total applications on hand decreased by 9.6%. The number of applications disposed of decreased by 10.2% to 4,578. Of these, 4,131 (90.2%) were approved.

The 4,131 cases added in August brought the total cases eligible to 15,104. This was a decrease of 1.8% compared to July. Payments were made for 13,124 (86.9%) of the eligible cases. There were 3,518 cases closed, which left 11,586 eligible cases continued to September.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $32,947 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY . . . 30

September, 1980 - In Summary

All Programs - Persons aided continued to increase in September as the maintenance programs (AFDC and GA) continue to record higher case loads. Persons receiving medical allowances declined, partially offsetting the trend. The 221,992 persons receiving financial aid was 459 (+0.2%) above August and 21,403 (+10.7%) over September, 1979. The annual trend occurred in AFDC (64%), GA (21%) and MA (15%).

The September monthly trend in persons aided occurred in the metropolitan counties, with Hennepin County accounting for most of the increase. The annual trend was generally statewide, with the nonmetropolitan counties showing a greater relative increase.

Fewer persons received medical allowances in September which accounted for lower total costs compared to August. Total costs of $71,512,262 were $576,332 (-0.8%) below August, 1980, but $5,575,445 (+8.5%) over September, 1979. Maintenance costs account for 73% and health care for 27% of this annual trend.

Aid to Families with Dependent Children (AFDC) - In September, 1980, 52,870 cases received payment, an increase of 565 (1.1%) above August, 1980. This is the 10th month of successive case increases. During the time period from November, 1979 through September, 1980, cases increased an average of 484 per month. In the current reporting month, expenditures totalled $17,199,984, a decline of $57,457 (0.3%) from August, the drop resulting from an increase in support collections of $227,902. Payments were $2,795,556 greater than in September, 1979, primarily due to 4,816 additional cases aided and a 7.0% increase in the basic standard, effective July 1, 1980.

The following table compares the average monthly number of cases and the total payments for the first quarter of fiscal year 1980, with the corresponding data and period in fiscal year 1979 by county category:

	July - September, 1980		July - September, 1979	
	Average Monthly Cases	Payments	Average Monthly Cases	Payments
Statewide	52,152	$51,141,683	47,750	$42,958,348
SMSA	37,126	36,471,318	34,950	31,731,337
Urban	26,984	26,763,082	25,973	23,705,631
Suburban	10,142	9,708,236	8,977	8,025,706
Rural	15,026	$14,670,365	12,800	$11,227,011

Statewide, the current quarterly average monthly payment cases were 9.2% higher in conjunction with a 19.0% rise in expenditures above the first quarter of the previous fiscal year. The rural counties displayed the most rapid rate of growth with an increase of 17.4% in cases and 30.7% in expenditures. The urban counties of Hennepin, Ramsey and St. Louis reported the lowest rate of growth, a gain of 3.9% in cases and 12.9% in payments.

The unemployed parent category stabilized in September, rising by only 35 (1.1%) cases and 2,094 (0.2%) in payments compared with August, 1980. This represents the lowest monthly rate of increase since October, 1979. The entire increase occurred within the SMSA counties, while the rural counties recorded a decline of 12 (1.1%) cases.

Approvals for September totalled 3,401, dropping 470 (12.1%) below August, 1980. Reopened cases comprised 42.4% of the approvals. Approval rates by county category fell by 19.7% for urban, 9.6% for suburban and 4.8% for rural. Closings affected 3,075 cases, 152 (4.7%) fewer than in August. Closings rose by 1.8% in the urban counties, but fell 11.2% in the suburban counties and 5.7% in the rural counties. For every case closed, there were 1.11 cases opened. Denials rose slightly above August, increasing by 21 (5.7%) for a total of 38%. The urban counties reported a 6.0% decrease in denials, but the opposite prevailed within the suburban and rural counties, which recorded a gain of 12.6% and 12.4% respectively. The following tables compare case activity in the first quarter of fiscal year 1981 with that in the comparable quarter of fiscal year 1980 within county category:

Approvals

	July - September, 1980				July - September, 1979			
	Total Cases				Total Cases			
	Total	New	Reopened	Transferred	Total	New	Reopened	Transferred
Statewide	11,358	5,446	5,003	909	9,109	4,372	3,977	760
SMSA	7,665	3,486	3,586	593	6,315	2,969	2,858	488
Urban	4,530	2,175	2,088	267	4,137	2,023	1,932	182
Suburban	3,135	1,311	1,498	326	2,178	946	926	306
Rural	3,693	1,960	1,417	316	2,794	1,403	1,119	272

Closings and Denials

	July - September, 1980		July - September, 1979	
	Closings	Denials	Closings	Denials
Statewide	9,200	1,129	8,326	840
SMSA	6,394	673	5,832	579
Urban	3,835	393	3,960	405
Suburban	2,559	280	1,872	174
Rural	2,806	456	2,494	261

From the above tables can be observed the rising trend in all areas of case activity. Statewide, approvals were 2,249 (24.7%) higher in the current quarter, with the suburban counties experiencing the greatest rate of growth, increasing by 957 (43.9%), followed by the rural counties with 899 (32.2%), and finally the urban counties reporting a gain of 393 (9.5%). Closings did not maintain the pace with approvals, but were 10.5% greater than recorded in the July to

September, 1979 period. Here again, the suburban counties lead with an increase in closings of 687 (36.7%), followed by the rural counties with 312 (12.5%) more, and the urban counties trailing with 125 (3.2%). For every case closed in the July through September, 1980 quarter, there were 1.23 cases opened compared with the 1.09 cases opened for every case closed in the July through September, 1979 quarter. Statewide, denials surged ahead at the rate of 34.4%. Denial rates increased 74.7% for the rural counties and 60.9% for the suburban counties. Conversely, the urban counties reported a decline in denials of 3.0%.

Emergency Assistance (EA) - Expenditures and cases bounced back following a dip in August to surpass the sharp rise recorded for July. September payments totalled $459,990 or $66,730 (17.0%) higher than in August, 1980. Payments were greater than during the steel strike in the autumn of 1977, and the highest since September, 1975. Cases rose to 1,763, an increase of 150 (9.3%) above the previous month. Cases receiving payment were the highest since October, 1977, the height of the steel strike.

Utilities, eviction and unemployment were again the leading causes for assistance. Combined expenditures for these three emergencies totalled $319,760 or 69.5% of the monthly expenditures. AFDC families received $106,578 for utilities and $65,459 for eviction for a total of $172,037, which represents 61.7% of the expenditures for this group. Eviction accounted for $61,349 (33.8%) of the non-AFDC expenses while utilities, at $52,482 (28.9%), was a distant second. Unemployment, the emergency experienced by 115 non-AFDC families, accounted for $33,892 or 18.6% of the total received by this recipient category.

AFDC families comprised 68.3% of all cases, but only 65.8% of the total expenditures. The urban counties have a greater preponderance of AFDC families (75.9%) compared with 49.2% for the suburban counties and only 29.0% for the rural counties.

The following table displays the average monthly cases and expenditures by county type for the first quarter of fiscal years 1979 and 1980.

	July - September, 1980		July - September, 1979	
	Cases	Expenditures	Cases	Expenditures
Statewide	1,694	$1,293,756	1,379	$1,028,541
SMSA	1,401	1,079,665	1,178	886,209
Urban	1,179	906,931	1,022	765,002
Suburban	222	172,734	156	117,007
Rural	293	$ 214,091	201	$ 142,332

In observing the above table, it is apparent that all areas of the state reported substantial gains both in terms of cases and expenditures. Statewide, cases rose 22.8% along with an increase in costs of 25.8% compared with the July through September, 1979 period. The rural counties reported the largest increase in cases and expenditures, rising 45.8% and 50.4% respectively. The suburban counties' gain was slightly below the rural counties, with a rise of 42.3% in cases and 47.6% in payments. A wide gap prevailed between the urban counties and the remainder of the state. Cases within the urban counties increased only 15.4% and expenditures rose 18.6%.

Minnesota Supplemental Aid (MSA) - In September, 10,439 persons received assistance through this program. This was 45 (0.4%) more than August but 306 (2.8%) below September, 1979. Expenditures at $843,875 were $46,484 (5.2%) less than August and $89,700 (11.9%) above one year ago.

The average monthly MSA payment fell during September. Averaging $80.84, it was $4.82 (5.6%) below August and $10.65 (15.2%) above September, 1979.

The decline in payments occurred in all three urban counties. Totalling $53,673.51, it was 9.9% below the previous month. St. Louis County indicated that their decline was the result of the retroactive rate adjustments which occurred in the previous months. These adjustments swelled the monthly expenditures in July and August and created an artificial payment level which subsided when the basic payments resumed. Very likely, the other two urban counties experienced this as well since their case loads were stable during August and September.

General Assistance (GA) - The total number of persons receiving GA for September, 1980 was 16,336. This was 263 (1.6%) more than August, 1980, and 4,607 (39.3%) more than September, 1979. The recipients in non-SMSA counties decreased from August, but this was offset by a substantial increase in suburban counties. The annual trend has been for substantial increases for Anoka, Dakota, Washington, Wright, Benton, Sherburne, Stearns, Ramsey and St. Louis Counties. For example, the number of GA recipients in Stearns County has more than tripled since a year ago. By contrast, Hennepin County has increased only minimally.

The average grant (gross dollars) per person for September, 1980 was $155.20. This was $2.74 (1.8%) more than August, 1980 and $26.81 (20.9%) more than September, 1979. Unusually high payments for Battered Women's Shelter Care (BWSC) this September caused $2.15 of the average grant increase from August. The total reported payments for BWSC increased from $23,087.12 to $58,325.28 from August to September, 1980. During this time, however, the number of BWSC recipients who do not concurrently receive other GA remained at 151 persons.

Note that the average grants shown in Table IV are exceptionally high for Dakota, Marshall, and Olmsted Counties. These high averages are attributable to the payment of large dollar amounts for Board and Room, Emergency Assistance, and Battered Women's Shelter Care. These dollar amounts are large because payments are made for previous months' needs, and thus they distort the current month's averages.

Application activity increased compared to August. The number of applications received was 17.1% higher and the total applications on hand increased by 14.6%. The number of applications disposed of increased by 15.6% to 5,294. Of these, 4,750 (89.7%) were approved.

The 4,750 cases added in September brought the total cases eligible to 16,336. This was an increase of 8.2% compared to August. Payments were made for 13,052 (79.9%) of the eligible cases. There were 4,221 cases closed which left 12,115 eligible cases continued to October.

Medical Assistance (MA) - Expenditures for September, 1980 totalled $50,473,032 for 125,712 recipients. The expenditure decreased by $623,972 (1.2%) from the previous month, but increased by $1,526,453 (3.1%) from one year ago. The recipient count decreased by 2,829 (2.2%) from the previous month, but increased by 12,258 (10.8%) from one year ago.

The average expenditure per recipient averaged $401.50 during September, 1980. The previous month reflected an average cost of $397.52 per recipient while, one year ago, it averaged $431.42. The decreased average cost was inversely proportional to the number of recipients utilizing MA services for the months specified. Since the recipient participation increased noticeably over one year, this indicates that there was an increase in MA utilization, mostly for the categories that generally incur less costly medical services. This was reflected in the AFDC category, which had approximately 10,000 more recipients that utilized MA during August and September, 1980 when compared to September, 1979. However, there was a general increase in utilization in most of the eligibility categories, but the major impact can be linked to the AFDC category. This utilization is shown in the following table:

MA Utilization Comparison for Three Specified Months

Basis of Eligibility	September, 1980	August, 1980	September, 1979
Aged SSI	8,230	8,838	8,565
Blind SSI	285	297	297

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $17,424 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/ Osteopathic Service, etc. Existing reports do not break these charges out separately.

**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under anotner subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

VII. Supplemental Security Income and Supplemental Aid by County - October, 1980 26-27

TECHNICAL NOTES 28

GLOSSARY 29

October, 1980 - In Summary

All Programs - Increased need for hospital care, prescribed drugs, and basic maintenance assistance caused a rise in persons aided in October. The October total of 225,491 persons receiving assistance was 3,499 (+1.6%) above September, of which 2,010 represent additional health care persons and 1,489 additional maintenance persons. The result was higher costs, up by $1,390,814 (+1.9%) (mostly hospital bills), to $72,903,076 for October. This represents an annual rate of expenditures of nearly $875,000,000 for all programs.

The annual rate of increase in persons aided for October was +10.8%, about the same as the two previous months. The 24,286 additional persons receiving assistance over the year were mostly for maintenance needs - 61% AFDC and 23% General Assistance. The reverse is true for the annual trend in expenditures, with the $16,702,892 (+29.7%) additional costs accounted for primarily by health care (74%).

Aid to Families with Dependent Children (AFDC) - Maintenance costs moved upward to $17,396,988 in October, an increase of $197,004 (1.1%) above September, 1980. The rise in expenditures was caused by an additional 590 (1.1%) families receiving payment and a reduction in collected IV-D refunds of $72,319 (5.0%).

All segments of the AFDC Program reported case increases with the exception of the unborn concurrent, which dropped by nine cases. The regular and unemployed parent segments each rose by 1.0%. Of the additional cases, 467 were regular, 31 unemployed parents, 63 unborn only and 38 foster care. Percentagewise, the suburban counties recorded the largest gain in payment cases, rising by 194 (1.9%), followed by the rural counties with 165 (1.1%) and the urban counties with 231 (0.8%). Compared with October, 1979, payments and cases were 21.9% and 11.1% greater respectively.

The unemployed parent segment appears to be leveling off after the sharp upsurge which began to occur in December of fiscal year 1980. Over the past three months (August, September and October), cases rose by only 66. The following table displays by month the unemployed parent cases and payments for the first third of fiscal years 1980 and 1981:

	1980		1981			
	Cases	Payments	Cases	Change From Month in Previous Year	Payments	Change From Month in Previous Year
July	1,259	$ 519,792	2,770	+120.0%	$1,234,519	+137.5%
August	1,309	$ 540,579	3,067	+134.3%	$1,363,633	+152.2%
September	1,281	$ 529,960	3,102	+142.2%	$1,366,537	+157.9%
October	1,310	$ 543,583	3,133	+139.2%	$1,353,817	+149.1%
Total	5,159	$2,133,914	12,072		$5,318,506	
Monthly Average	1,290	$ 533,479	3,018	+134.0%	$1,329,627	+149.2%

Approvals advanced to 3,885, rising 484 (14.2%) above September, 1980 and were 860 (28.4%) higher than in October, 1979. Reopened cases numbered 1,552 (40.0%), new cases 1,907 (49.1%) and transfers 426 (10.9%) of the total approvals. The bulk of the approvals, 388 or 80.2%, resided in the three urban counties, with 81 or 16.7% in the rural counties and 15 or 3.1% in the suburban counties. From July through October, 1980, approvals totalled 15,243 compared with 12,134 for the same months in 1979. This represents an increase of 3,109 cases or 25.6%.

Closings rose to 3,285, rising 210 (6.8%) above September, 1980. For every case closed in October, there were 1.18 cases opened. In the four months from July through October, 1980, there were 1.22 cases opened for every case closed.

Denials jumped 11.4% over September, accruing to 431. Denials represented 10.0% of the cases acted upon in October.

Emergency Assistance (EA) - During October, this program recorded advances along all program parameters - cases, persons and payments. The average monthly payments also increased, payments per case to $274.64 (+5.3%) and payments per person to $81.51 (+8.0%).

In October, 6,152 persons received assistance. This is 65 (1.1%) more than September and 1,476 (32.3%) above one year ago. Cases numbered 1,828 and were 65 (3.7%) more than the previous month. These person and case levels are the highest recorded since October, 1977 when the steel strike affected the economy of northern Minnesota.

Hennepin County was primarily responsible for the October change. The AFDC segment carried the increase, rising by 101 cases (19.8%) and 247 persons (14%). This, however, was partially offset by the non-AFDC component, which fell by 15 cases (10.3%) and 70 persons (13.2%). Most of the advance was attributable to the emergencies of "Eviction from Shelter", up 39 cases, 113 persons and $26,994.43, and "Other", up 50 cases, 171 persons and $22,586.63. Of the "Other" emergencies, the greatest increases occurred in the categories of major home repair, lost or stolen cash, emergency food, and furniture purchase.

Payments in October totalled $502,040. This was $42,050 (9.1%) greater than September, primarily because of increased evictions, up $26,677, and emergency fuel situations up $15,070. October payments were $182,619 (57.2%) above October, 1979. The emergencies leading the change were Utilities up $90,254 (174.3%), Eviction from Shelter up $69,674 (83.1%), and Migrant Families up $8,189 (496.6%).

AFDC families received 66.2% of October's payments. This is an increase from October, 1979 when AFDC families represented 56.7% of the total.

Minnesota Supplemental Aid (MSA) - In October, 10,478 aged, blind or disabled persons received assistance, 39 (0.4%) more than September but 275 (2.6%) below October, 1979.

Expenditures totalled $836,338 during the month. This was $7,537 (0.9%) lower than the previous month and $43,896 (5.5%) higher than one year ago. The decline from September occurred in the disabled category where payments declined by $8,165 to $633,592. Ramsey County accounted for $4,761 (58.3%) of this change. Overall, the average monthly expenditure per person totalled $79.82 or $1.02 (1.3%) below the September level.

General Assistance (GA) - Application activity decreased compared to September. The number of applications received was 11.3% lower and the total applications on hand decreased by 9.7%. The number of applications disposed of decreased by 9.3% to 4,802. Of these, 4,238 (88.3%) were approved.

The 4,238 cases added in October brought the total cases eligible to 16,274. This was a decrease of 0.4% compared to September. Payments were made for 13,457 (82.7%) of the eligible cases. There were 3,968 cases closed, which left 12,306 eligible cases continued to November.

The total number of persons receiving GA for October, 1980, was 16,855. This was 519 (3.2%) more than September, 1980, and 5,526 (48.8%) more than October, 1979. The average grant (gross dollars) per person for October, 1980, was $151.00. This was $4.20 (2.7%) less than September, 1980, and $16.89 (12.6%) more than October, 1979.

Old familiar patterns are in evidence since June of 1980. Total paid cases, persons, and payments are showing typical seasonal increases and the decreasing average number of persons per case since June is typical of the secular trend which has been in effect since 1967. The average grant per person increased from July through September, but it dropped from September to October. The cause for this drop in the average grant has not yet been identified. The drop appears to be statewide, but it is most evident in Hennepin County.

One difficulty in observing trends is the intermittent character of payments for Battered Women's Shelter Care (BWSC). These payments are made to vendors for bills which may be for several months of care. A result, particularly in the smaller agencies, is an erratic monthly change in the average grant per person. (See Table IV.) The following table shows the reported (Ramsey not reporting) totals for BWSC.

Battered Women's Shelter Care Reported for 1980

	July	August	September	October
Cases				
Receiving Other GA	13	20	29	47
Not Receiving Other GA	43	63	120	72
Persons				
Receiving Other GA	19	26	56	114
Not Receiving Other GA	91	151	304	192
Payments (rounded to dollars)				
Receiving Other GA	3,288	2,969	6,124	32,285
Not Receiving Other GA	16,920	20,077	52,202	35,664

Medical Assistance (MA) - Expenditures for October totalled $51,622,522 for 134,519 recipients. The expenditure increased by $1,149,490 (2.3%) from the previous month and increased by $12,323,366 (31.4%) from one year ago. The recipient count increased by 8,807 (7.0%) from the previous month and increased by 20,952 (18.4%) from one year ago.

The main reason that October reflected more recipients utilizing medical services was because the number of claims processed for payment increased. For October, 1979, there were 676,414 claims processed for payment with 487,157 (71.9%) being paid. For September, 1980, the claims increased to 718,305 with 553,429 (77.0%) being paid. The number of claims for October, 1980 increased to 795,557 with 604,703 (76.0%) being paid. All service categories were generally affected; however, some reflected more significant changes.

Approximately half of the expenditure increase reflected from October, 1979 to October, 1980 resulted because of the irregular institutional payments. The remainder resulted because of increased utilization as well as increased unit costs.

Nursing Home Utilization

During October, there were 33,856 recipients that received care in long-term facilities (i.e., SNF, ICF I and II, ICF-MR and Institutional MRs). Hennepin County accounted for most at 8,033 (23.7%), followed with Ramsey with 3,925 (11.6%), and St. Louis with 2,212 (6.5%). Together, these counties accounted for 41.9% of the recipients and 45.4% of the total expenditure. The population composite of these three counties reflected 39.2% of the state total (i.e., according to the latest population estimates). This means that in Hennepin County, one out of every 114 persons in the population utilized nursing home care; in Ramsey County, it was one out of every 116, and in St. Louis County, one out of every 100. Kittson County had the largest ratio with one out of every 46 and Anoka the smallest with one out of every 465. This ratio, to a certain degree, reflects the general population compositions in each county. Generally, many would expect Hennepin and Ramsey Counties to have one of the larger ratios when compared to other counties statewide, but that is not necessarily true. The following table lists each county and their respective ratio of nursing home recipients during October, 1980 to the total population; each ratio is reduced to reflect a comparison of how many persons there are in each county per nursing home recipient:

Proportion of Nursing Home Recipients to Population
Within Each County Arranged in Descending Order

Kittson	1:46	Yellow Medicine	1:81	St. Louis	1:100	Winona	1:125

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $28,020 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 28

GLOSSARY 29

In Summary - November, 1980

All Programs - Persons aided declined in November, 1980 as fewer medical claims were processed, particularly the per diem claims for state hospital patients. The General Assistance Program also contributed to the decline, after recording a consistent upward trend since last May, 1980. Total persons aided was 221,832, 3,659 (-1.6%) below October, but still 19,083 (+9.4%) over November, 1979. The AFDC and GA Programs continue to account for the annual trend.

With fewer medical claims, total payments dropped to $65,142,709, $7,760,367 (-10.6%) under October and $9,779,656 (-13.1%) under November, 1979. The irregular payments for state hospital cases account for both the monthly and annual trend.

Aid to Families with Dependent Children (AFDC) - In November, the AFDC Program displayed a mixed pattern. Recipients and case levels registered increases while expenditures declined slightly.

Recipients reached 144,944 during the month, 151 (0.1%) more than October and 14,977 (11.5%) above one year ago. The case load increase has been heavy during the first five months of fiscal year 1981. During this period, recipient totals have climbed by 8,153, an increase of 6%.

Cases totalled 53,603 in November. This is 143 (0.3%) higher than October and 5,574 (11.6%) greater than the case load of one year ago. The bulk of the case increase in November occurred within the regular category, with slight increases registered for unemployed fathers and foster care in institutions.

November's expenditures were $17,363,383 or $33,605 (0.2%) below October. By contrast, this program cost $14,246,784 in November, 1979, $3,116,599 (21.9%) less. The major factor contributing to lower payments in November, 1980 were decreases in supplemental and initial payments.

Approvals totalled 3,425 cases, dropping by 460 (11.8%) below October, 1980. The case decline by type was: new - 386 (20.2%), reopened - 52 (3.4%), and transfers - 22 (5.2%). Of the three county categories, the urban counties reported the greatest reduction in approvals, decreasing 269 (16.5%) cases. The major portion of the decline represented new cases which fell by 213 (25.7%). Approvals for the rural counties decreased 149 (12.2%), with new cases falling off by 135 (20.2%). The suburban counties reported only a -42 (4.1%) case differential with 38 (9.2%) fewer new cases. Compared with November, 1979, approvals were 594 (21.0%) higher with case increases of 229 (17.7%) for new, 327 (27.9%) for reopened and 38 (10.4%) for transfers between counties. The above comparisons portend toward a faster rate of growth for reopened cases.

Closings numbered 3,030, a decrease of 255 (7.8%) from the previous month, but 285 (10.4%) above November, 1979. For every case closed in the current reporting month, there were 1.13 cases opened compared to 1.03 openings for every case closed in November one year ago.

Denials also registered a decline in case activity with 52 (12.1%) fewer occurrences than in the prior month, but were 93 (32.5%) higher than in November, 1979. Of the total cases acted upon, 10.0% were denied compared with 9.2% in the same month in 1979.

Emergency Assistance (EA) - In November, 4,204 persons were assisted by this program. This was a decline of 1,948 (31.7%) from October and is 169 (3.9%) below one year ago. The decline was general in nature and occurred across all county categories (urban, rural, suburban). The AFDC segment was the major contributor to the decline, falling 1,750 persons (41.1%). The non-AFDC segment also decreased, but to a lesser extent, registering 199 fewer persons, or a loss of 10.5%.

Cases numbered 1,174 during the month, a decline of 654 (38.5%) from October and 97 (0.1%) under November, 1979. Most of this decrease, 77%, occurred within the emergencies of Eviction from Shelter, down 97 or 23.2%, and Utilities, down 411 cases or 69.4%.

Expenditures totalled $292,319 in November. This sum was $209,721 (41.8%) below October and is $25,624 (8.1%) under that recorded in November, 1979. Declines were registered in nearly all defined emergency areas, with Eviction from Shelter and Utilities together accounting for $165,753 (79.0%) of the decline. Only four categories increased. These emergencies were Fire - up $1,405 (42.3%), Accident - up $217 (4.4%), No Employment - up $780 (4.1%), and Emergency Fuel - up $7,073 (46.9%). However, these increases were so slight as to have little effect on the declines registered in other defined emergency areas.

Minnesota Supplemental Aid (MSA) - In November, 10,393 aged, blind and disabled persons received assistance. This is 85 (0.8%) lower than October and 358 (3.3%) below one year ago.

The decline in November's case load occurred in the aged and disabled categories. These categories fell primarily because of lower case loads in Big Stone, Dodge, Ramsey and Waseca Counties. The three rural counties make the $5.00 payments for clothing and personal needs to boarding home residents at quarterly intervals. This contributes to higher case load totals, as in October.

Expenditures were $872,394 during the month, $36,056 (4.3%) higher than October, and $49,498 (6.0%) above November, 1979. The November increase was general in nature and was affected by higher costs in Hennepin and St. Louis Counties in both the aged and disabled categories. The corrective and special needs payment categories were the areas of advance, and this was further bolstered by reduced cancellations.

General Assistance (GA) - Application activity decreased compared to October. The number of applications received was 4.9% lower and the total applications on hand decreased by 5.8%. The number of applications disposed of decreased by 6.8% to 4,477. Of these, 3,948 (88.2%) were approved.

The 3,948 cases added in November brought the total cases eligible to 16,254. This was a decrease of 0.1% compared to October. Payments were made for 13,396 (82.4%) of the eligible cases. There were 3,608 cases closed which left 12,646 eligible cases continued to December.

The total number of persons receiving GA for November 1980 was 15,969. This was 886 (5.3%) less than October 1980. The decrease in persons was 4.1%, 14.8%, and 5.2% for single person, family with children, and family with adults only cases, respectively. The decline in Hennepin County's GA recipients contributed strongly to the decline in the state total. Hennepin shows a total decline of 791 persons. While there were other modest increases in Hennepin, there were decreases of 931 and 511 persons receiving Emergency Need and Special Need, respectively. The monthly decline notwithstanding, the GA recipients in the state increased by 3,932 (32.7%) from the November 1979 total.

The average grant (gross dollars) per person for November 1980 was $159.11. This was $8.11 (5.4%) more than October 1980 and $29.00 (22.3%) more than November 1979. The average grant was only 2.5% more than the $155.20 in September 1980 because the October average had dropped from the September level. The Emergency Need average grant per person dropped from September to October, and then it rose in November. This change apparently produced the fluctuation in the average grant for the total program.

The typical seasonal trend is for a monthly increase in the total payments from Summer into Winter. This increase is typically an erratic one, depending on the various combinations of need experienced by the GA recipients. The following table shows the available GA payment data on some components of need.

GA Subprogram Payment Trends

	Emergency(4) Need	Special(1,2) Need	Board(2,5) & Room	Unwed(1,2,3) Mother	State(2) Hospital	Battered Women's Shelter Care	Emergency Fuel Assistance	Non-Specified Need Type	Total
August	$140,180	$13,227	$400,730	$7,114	$7,429	$27,823	$ 0	$1,854,027	$2,450,530
September	152,515	17,985	405,981	8,071	6,123	67,473	0	1,877,233	2,535,381

(4)Ramsey did not report this prior to November 1980.
(5)Ramsey did not report this prior to October 1980.

Medical Assistance (MA) - Expenditures for November totalled $44,073,739 for 121,900 recipients. The expenditure decreased by $7,548,783 (14.6%) from the previous month and $13,894,908 (24.0%) from one year ago. The recipient count decreased by 12,619 (9.4%) from the previous month, but increased by 6,243 (5.4%) from one year ago.

The November expenditure decreased essentially because there was no major institutional payment processed and paid during the month. The institutional payments usually average between five and six million dollars monthly. However, for November, 1979, it was $17,734,987; for October, 1980, it was $6,382,382; and for November, 1980, it was $168,980 (adjustments only). The expenditure fluctuations were basically controlled by these irregular payments.

November, 1980 reflected a reduction in the number of claims that were processed and paid. During October, 604,703 claims were processed and paid. During November, the number of claims paid dropped to 522,497. This was essentially why the recipient count dropped during November.

Non-Nursing Home Utilization

During November, there were 91,656 non-nursing home recipients that utilized medical services under Medicaid (i.e., payments were made on their behalf). Hennepin County accounted for 25,179 (27.5%), followed by Ramsey with 13,400 (14.6%), and St. Louis with 7,062 (7.7%). Together, the three largest counties accounted for 49.8% of the non-nursing home recipients, whereas their corresponding population reflects 39.2% of the state total (i.e., using the latest estimate available). Clearwater County reflected the greatest concentration of non-nursing home MA recipients at about 5% of the county's population, with Steele County with the lowest at just under 1% of the county population; the statewide percentage average was about 2.3%. Most (69.9%) of the non-nursing home recipients were AFDC recipients. The following table lists each county and their respective ratio of non-nursing home recipients during November, 1980 to the total population; each ratio is reduced to reflect a comparison of how many persons there are in each county per non-nursing home recipient (the nursing home ratio is itemized in the October, 1980 publication):

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $8,767 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

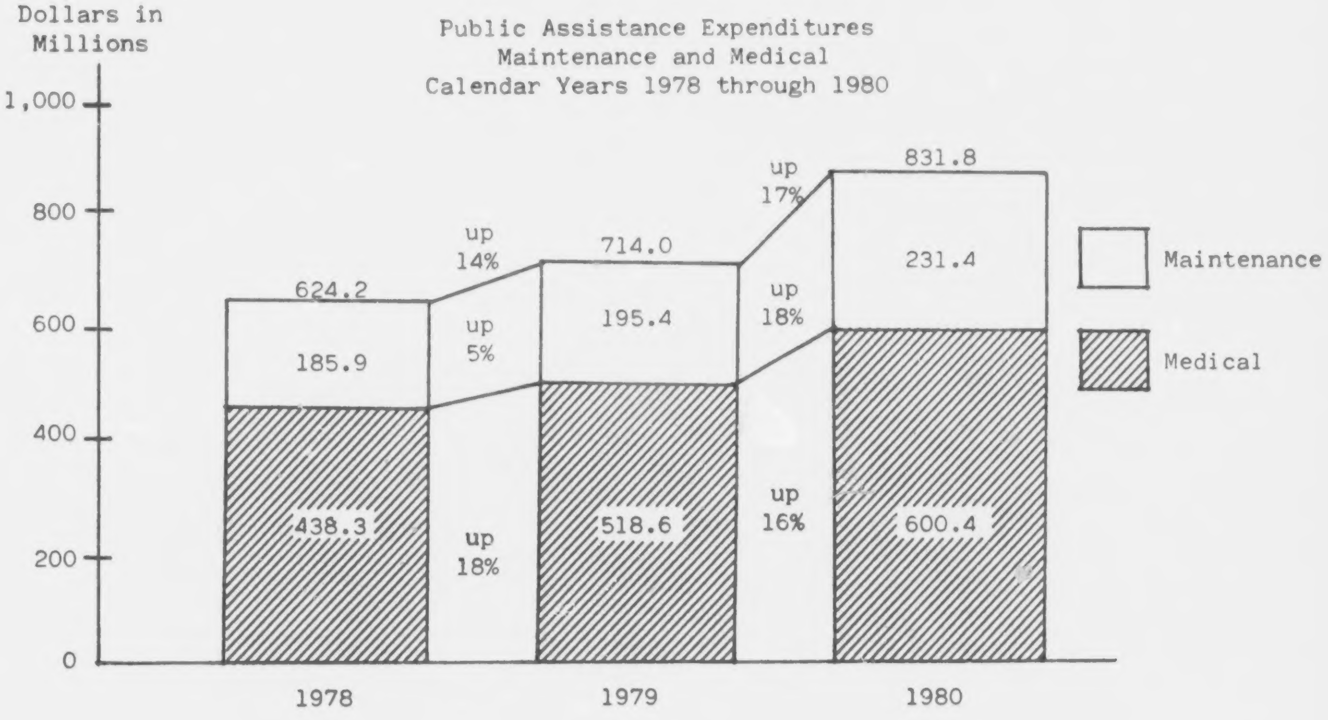
TECHNICAL NOTES 30

GLOSSARY 31

December, 1980 - In Summary

All Programs - Total Income Maintenance expenditures reached a record level in December, 1980 as more medical claims were processed. The total of $85,125,243 was $19,982,534 (+30.7%) above November, 1980 and $17,724,693 (+26.3%) over December, 1979. In the annual trend, health care costs accounted for 77% and maintenance costs 23%.

Total expenditures for the calendar year 1980 amounted to $831,833,926, 17% above 1979. Costs went up faster in 1980 compared to 1979 as result of a higher case load due to the recession. The three-year trend is presented in the following chart:



Persons aided in December, 1980 reached a record level of 230,822. The monthly trend of 8,990 additional persons reflects primarily more medical only cases, while the annual increase of 22,660 persons is accounted for primarily by AFDC families and General Assistance cases.

Aid to Families with Dependent Children (AFDC) - In December, 1980, 53,856 cases received payment, an increase of 253 (0.5%) above November, 1980. This represents the 13th month of successive case increases. During calendar year 1980, cases increased an average of 430 per month.

Expenditures for December totalled $16,954,516, a decline of $408,866 (2.4%) from November, the drop resulting from increases in support collections of $269,991 and in refunds other than support collections along with grant cancellations of $331,540. Refunds other than support collections occur from such matters as fraud, overpayment, social security reimbursement, increased income, unemployment compensation, retired survivors disability insurance, etc.

The following table compares the average monthly number of cases and the total payments for the second quarter of fiscal year 1981, with the corresponding quarter in fiscal year 1980, by county category:

	October - December, 1980		October - December, 1979	
	Average Monthly Cases	Payments	Average Monthly Cases	Payments
Statewide	53,639	$51,714,888	48,134	$42,577,651
SMSA	38,123	$36,894,494	35,104	$31,141,887
Urban	27,524	$27,003,408	25,939	$23,533,560
Suburban	10,599	$ 9,891,086	9,165	$ 7,608,327
Rural	15,516	$14,820,394	13,030	$11,435,764

Statewide, the current quarterly average monthly payment cases were 5,505 (11.4%) higher and expenditures rose $9,137,237 (21.5%) above the corresponding time period in the previous fiscal year. The rural counties displayed the most rapid rate of growth with an increase of 2,486 (19.1%) in average monthly cases. Their net expenditure rise was $3,384,630 (29.6%). The three urban counties of Hennepin, Ramsey, and St. Louis reported the lowest rate of growth, a gain of 1,585 (6.1%) in average monthly paid cases and $3,469,848 (14.7%) more in payments. In the middle range were the suburban counties, whose average monthly number of payment cases increased by 1,434 (15.6%). However, expenditures for the suburban counties rose $2,282,759 (30.0%), the highest rate of advance for the three county groups.

The unemployed father segment's rapid increase over the past year was halted in September, 1980. Little variation was experienced through November, but December recorded another advance, with cases rising 242 (7.7%) above November, 1980. The November to December change occurred in all county categories with rural, suburban and urban up 10.1%, 7.0%, and 6.1% respectively.

Approvals for December totalled 3,640, rising 215 (6.3%) above November, 1980. Reopened cases comprised 44.6% of the total approvals. Approval rates by county category rose by 5.3% for urban, 9.7% for suburban, and 4.3% for rural. Closings affected 3,025 cases, only five fewer than in November. Closings increased by 0.7% in the urban counties, 1.1% in the suburban counties, but fell 2.8% in the rural counties. For every case closed, there were 1.20 cases opened. Denials increased by 53 (14.0%) cases. All county categories reported increases in denials, with 28.2% for suburban, 14.7% for rural, and 6.7% for urban. The following tables compare case activity in the second quarter of fiscal year 1981 with that in the corresponding quarter of fiscal year 1980 within each county category:

Approvals

	October - December, 1980 Total Cases				October - December, 1979 Total Cases			
	Total	New	Reopened	Transferred	Total	New	Reopened	Transferred
Statewide	10,950	5,100	4,677	1,173	8,657	4,074	3,556	1,027
SMSA	7,530	3,342	3,397	791	5,867	2,654	2,570	643
Urban	4,437	2,172	1,942	323	3,749	1,704	1,759	286
Suburban	3,093	1,170	1,455	468	2,118	950	811	357
Rural	3,420	1,758	1,280	382	2,790	1,420	986	384

Closings and Denials

	October - December, 1980		October - December, 1979	
	Closings	Denials	Closings	Denials
Statewide	9,340	1,242	8,192	870
SMSA	6,469	857	5,788	590
Urban	3,744	550	3,846	381
Suburban	2,725	307	1,942	209
Rural	2,871	385	2,404	280

The above tables project the rising trend in all areas of case activity. Statewide approvals were 2,293 (26.5%) higher in the current quarter, with the suburban counties experiencing the greatest rate of growth, increasing 46.0%, followed by the urban and rural counties both tying at a plus 18.4%. Closings were 14.0% greater than recorded in the October to December, 1979 period. Here again, the suburban counties lead with an increase in closings of 783 (40.3%), and then the rural counties with 467 (19.4%). The urban counties reported a decline of 102 (2.7%). For every case closed in the October through December, 1980 quarter, there were 1.17 cases opened compared with the 1.06 cases opened for every case closed in the October through December, 1979 quarter. Statewide, denials surged ahead at the rate of 42.8%. By county category, denial rates increased 44.4% for the urban, 46.9% for the suburban, and 37.5% for the rural. It appears from the case activity data that the suburban counties experience a higher rate of case turnover.

Emergency Assistance (EA) - This assistance program was characterized by higher activity levels in December, culminating in increased expenditures. The advance was induced by an increase in the number of AFDC emergency situations. Recipients totalled 4,260 in December, which represents an increase of 56 (1.3%) from November and is 69 (1.6%) higher than one year ago.

The recipient increase, while modest, masks the activity behind the scenes. The AFDC segment advanced by 223 (8.9%) recipients in December to 2,727, but was offset by the non-AFDC group which declined by 167 (9.8%) to 1,533 recipients. Both segments exhibited declines in average family size, with the AFDC families changing from 3.35 to 3.15 persons per family while the non-AFDC segment declined from 3.99 to 3.72 persons per family.

There were 1,277 cases in December. This is 103 (8.8%) above November and 71 (5.9%) higher than one year ago.

Expenditures totalled $314,980, an increase of $22,661 (7.8%) from November and $18,041 (6.1%) more than December, 1979. The emergencies contributing to the December advance were Eviction from Shelter +$11,374 (11.8%), Other +$8,882 (20.7%), Illness +$4,131 (154.3%), Migrant Family in Need +$1,295 (21.8%), and No Furniture/Appliance category (Ramsey County) up $15,169 (27.3%).

The following table compares the average monthly number of cases and total net expenditures for the three most utilized types of emergencies for the second quarter of fiscal year 1981, with that for the corresponding period in fiscal year 1980.

	October - December, 1980		October - December, 1979	
	Monthly Average Cases	Expenditures Net Total	Monthly Average Cases	Expenditures Net Total
Eviction	366	$357,550	286	$238,797
Utilities	295	$196,023	196	$111,527
Unemployment	61	$ 56,737	163	$124,568

The following table displays the average monthly number of cases and expenditures by county type for the second quarter of fiscal years 1979 and 1980.

	October - December, 1980		October - December, 1979	
	Monthly Average Cases	Expenditures Net Total	Monthly Average Cases	Expenditures Net Total
Statewide	1,426	$1,109,330	1,264	$934,304
SMSA	1,175	$ 941,573	973	$728,501
Urban	998	$ 802,640	803	$597,405
Suburban	177	$ 138,933	170	$131,096
Rural	251	$ 167,757	291	$205,803

Minnesota Supplemental Aid (MSA) - In December, 10,390 persons were aided by this program, 3 (0.0%) fewer than November and 343 (3.2%) below one year ago. Expenditures totalled $906,986. This represents a modest increase of $34,592 (4.0%) from November and was $102,648 (12.8%) greater than December, 1979.

The average monthly MSA payment advanced during December. Averaging $80.84, it was $3.35 (4.0%) higher than November and $12.35 (16.5%) above one year ago.

The higher expenditure level is attributable to Ramsey County, where retroactive payments were made for disabled recipients covering the July to December period. These payments totalled $39,053 in December, $32,717 (516.4%) more than November.

General Assistance (GA) - Application activity increased compared to November. The number of applications received was 12.7% higher and the total applications on hand increased by 11.7%. The number of applications disposed of increased by 13.5% to 5,080. Of these, 4,587 (90.3%) were approved.

The 4,587 cases added in December brought the total cases eligible to 17,161. This was an increase of 5.6% compared to November. Payments were made for 13,878 (80.9%) of the eligible cases. There were 4,243 cases closed which left 12,918 eligible cases continued to January.

The total number of persons receiving GA for December 1980 was 17,276, the highest December total since 1976. This was 1,307 (8.2%) more than November 1980 and 5,104 (41.9%) more than December 1979.

The average grant (gross dollars) per person for December 1980 was $158.78. This was $.33 (0.2%) less than November 1980 and $25.49 (19.1%) more than December 1979.

The drop in statewide average grant per person from November to December may be attributed to Hennepin County's increase in Emergency Need (EN) recipients. The drop may be thus accounted for in spite of the fact that Hennepin's average EN grant increased. Statewide, there was an increase of 463 EN recipients over November; 364 of these were in Hennepin. Meanwhile, Hennepin's average EN grant increased from $41.24 to $44.06. Hennepin's increase in the number of EN recipients, coupled with the low average EN grant, greatly contributed to the statewide drop in the total program.

Medical Assistance (MA) - Each year, there are normally two months in which more medical claims are processed because of a bi-weekly payment system. December, 1980 was one of these months containing three warrant cycles. There were also more claims processed in December for state institutional residents, as none were processed in November. These factors contributed to the monthly increases of 45.7% in the MA expenditures of $64,205,622 in December. All of the major services (other than long-term care) contributed to the trend with inpatient hospital costs recording the largest increase.

Expenditures for calendar year 1980 totalled $600,399,827 compared with $516,567,832 in 1979, or 16.2% higher. This compares with a rate of increase of 18.3% in 1979 over 1978.

The MA case load jumped to 156,465 persons in December, 34,565 or 28.4% over November, most of this trend occurring in AFDC recipients. The number of AFDC recipients receiving health care was 90,147, 26,064 (+40.6%) above November, and 22,031 (+32.3%) over December, 1979.

Long-Term Care Cost Trends - In the January, 1980 Statistical Summary, a trend series was presented showing the growth of costs of long-term care and for ancillary services given to patients in long-term care. It was noted that these two cost items account for a larger portion of the total Medical Assistance dollar each year, that in calendar year 1976, 64.3% of the total MA expenditures was spent for nursing home recipients, increasing to 71.7% in calendar year 1979. Data for calendar year 1980 shows that the trend continues as 72.4% of the MA dollar was spent for recipients in long-term care.

In the period from 1976 to 1980, total MA costs have increased 82.9%, while long-term care costs have more than doubled--105.1% for long-term care and 113.3% for ancillary services. The trend is presented in the following table:

Medical Assistance Expenditures
Total Program, Long-Term Care, and Ancillary Services
Calendar Years 1976 - 1980

	Expenditures (000 Omitted)					
Year	Total	Long-Term Care	%	Ancillary Services	%	Combined Percentage
1976	$328,277	$191,696	58.4%	$19,339	5.9%	64.3%

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $24,489 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/ Osteopathic Service, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

TECHNICAL NOTES 31

GLOSSARY 32

January, 1981 - In Summary

All Programs - Applications for help with maintenance needs continue to increase in January, 1981. Although this December - January trend was not as great as a year ago, persons requesting help (in AFDC and in GA) were up by 14.6% over January, 1980.

Persons receiving maintenance assistance totalled 177,866 in January, 1981, 3,033 (1.7%) above December, 1980 and 19,498 (12.3%) above January, 1980.

Maintenance costs of $21,547,524 in January, 1981 was $627,904 (3.0%) above December, 1980 and $4,458,235 (26.1%) ahead of one year ago. The annual trend reflects both the higher case load and the change in assistance standards July 1, 1980 (cost of living adjustment).

Health care costs declined in January, 1981 from the previous month as fewer medical claims were processed. The annual trend shows a 16.4% increase as a result of an 8.8% rise in persons receiving care and a higher average grant of 7.0%. Most of the additional persons receiving care were from AFDC families.

Aid to Families with Dependent Children (AFDC) - The AFDC Program continues to move upward both in terms of cases and expenditures. Cases have risen steadily month by month since December, 1979. In the past 14 months, cases receiving payment increased by 6,217 (12.9%), for an average gain of 444 cases per month. Of the 6,217 cases, 55.1% were residents of SMSA counties and 44.9% represented rural counties. In January, 1981, cases receiving payment totalled 54,471 or 615 (1.1%) higher than in December, 1980. The rural counties contributed 56.6% of the additional cases, followed by the urban counties with 28.8%, and the suburban counties with 14.6%. Of the rural counties, Crow Wing and Itasca led the pace, reporting increases of 36 and 31 cases respectively. Crow Wing County experienced a case increase of 25.3% during the past year because of the recession. Presently facing adverse economic conditions with an unemployment rate of 17.0%, it has more than its share of problems. Two large industries have closed in Brainerd and another is in serious financial trouble. A large number of families from outlying regions have migrated into Brainerd with expectations of finding employment. Often disillusioned, their only alternative is to seek welfare assistance. A comparable increase in case load is anticipated over the next year.

January expenditures totalled $17,420,320, an increase of $465,803 (2.7%) above December, 1980. The January expenditures, coupled with the collections of $1,347,113 from responsible fathers, brings the total monies received by AFDC families to $18,767,433. The IV-D collections represent 7.2% of the total monies (net expenditures plus IV-D collections) received by AFDC families. Noting the annual trend, January's expenses were $3,261,027 (23.0%) higher than one year ago.

The unemployed parent segment totalled $1,620,598 in January. This was $160,986 (11.0%) more than December, 1980 and a phenomenal $911,473 (128.5%) above January, 1980. The average monthly increase during the latest 12-month period was $75,956. Cases likewise rose at an unprecedented rate, rising by 321 (9.5%) over December, 1980 and 1,983 (114.6%) above January, 1980.

Emergency Assistance (EA) - This assistance program declined in all major categories--cases, recipients and payments during January. This change was the direct result of lower AFDC participation. AFDC families were 91 (11.8%) fewer than in December while the non-AFDC segment remained relatively stable. Cases totalled 1,180, 97 (7.6%) below the previous month.

Recipients numbered 3,986 in January, 274 (6.4%) fewer than December, and 465 (10.4%) below January, 1980. The annual recipient decline is due to fewer non-AFDC recipients. This segment has fallen to 1,500 persons, a decline of 705 (32.0%) since January, 1980. Non-AFDC recipients now represent 37.6% of the total.

January's expenditure was $300,883, a decline of $14,097 (4.5%) from December and $36,474 (10.8%) below January, 1980. The reasons for the December - January change are due to lower expenditures in most of the emergency categories, the exceptions being Strike up $2,139 (169.8%), Death $520 (54.9%), Eviction $26,234 (24.4%) and No Employment $3,048 (17.4%).

Emergency Fuel Assistance totalled $14,109, a decrease of 8,783 (38.4%) from December, 1980.

Since the resumption of Emergency Fuel Assistance in October, 1980, $74,215 has been expended for fuel by the county agencies. This expenditure represents 5.3% of the EA payments within this four-month period. The scope of this assistance can be seen in the table below.

Emergency Fuel Assistance
by Month

	Families	Recipients	Expenditures
October, 1980	70	261	$15,071
November	106	412	22,143
December	103	415	22,892
January, 1981	68	265	14,109
Total (Cumulative)	347	1,353	$74,215
Monthly Average	87	338	$18,554

Minnesota Supplemental Aid (MSA) - During January, 10,493 aged, blind or disabled recipients were served by this program. This is 103 (1.0%) more than December, 1980 but 234 (2.2%) fewer than one year ago. Hennepin and St. Louis Counties accounted for 56 (54.4%) of the December to January increase, 32 of which were in the aged category. This change in state case load is within the normal pattern of fluctuation and should not be construed as a trend.

Expenditures totalled $956,893 during January, $49,907 (5.5%) higher than December and 141,723 (17.4%) more than January, 1979. The average grant per person reached $91.19 in January, an all-time high. This is $3.90 (4.5%) above the previous month and $15.20 (20.0%) higher than one year ago. The increase in the grant average was evident in all recipient categories, with the aged segment leading the pace. The changes from December for the aged, blind and disabled were $7.97 (13.2%), $3.22 (4.1%), and $2.78 (2.8%) respectively.

General Assistance (GA) - Application activity was greater in January than in December. This brought about a little greater than the typical seasonal increase in GA recipients. Applications received and applications approved increased while applications denied and cases closed decreased compared with December. All of this increased the number of recipients by 933 which brought the total to 18,209 recipients. This increase is greater than the typical (average for the past five years) seasonal increase of 717 recipients from December to January.

This increase in the number of GA recipients from December to January and the month-to-month increases since the spring of 1980 have brought the number back up to a level which has not occurred since 1977. During 1978 and 1979 economic conditions were good and the number of recipients dropped to a low point in October, 1979 (see graph). Since then, the trend has assumed a similar pattern to that experienced in 1974 and 1975.

The January 1981 number of persons aided is still below the peak for the highest January on record, which was January 1976. This comparison is noted in the following table:

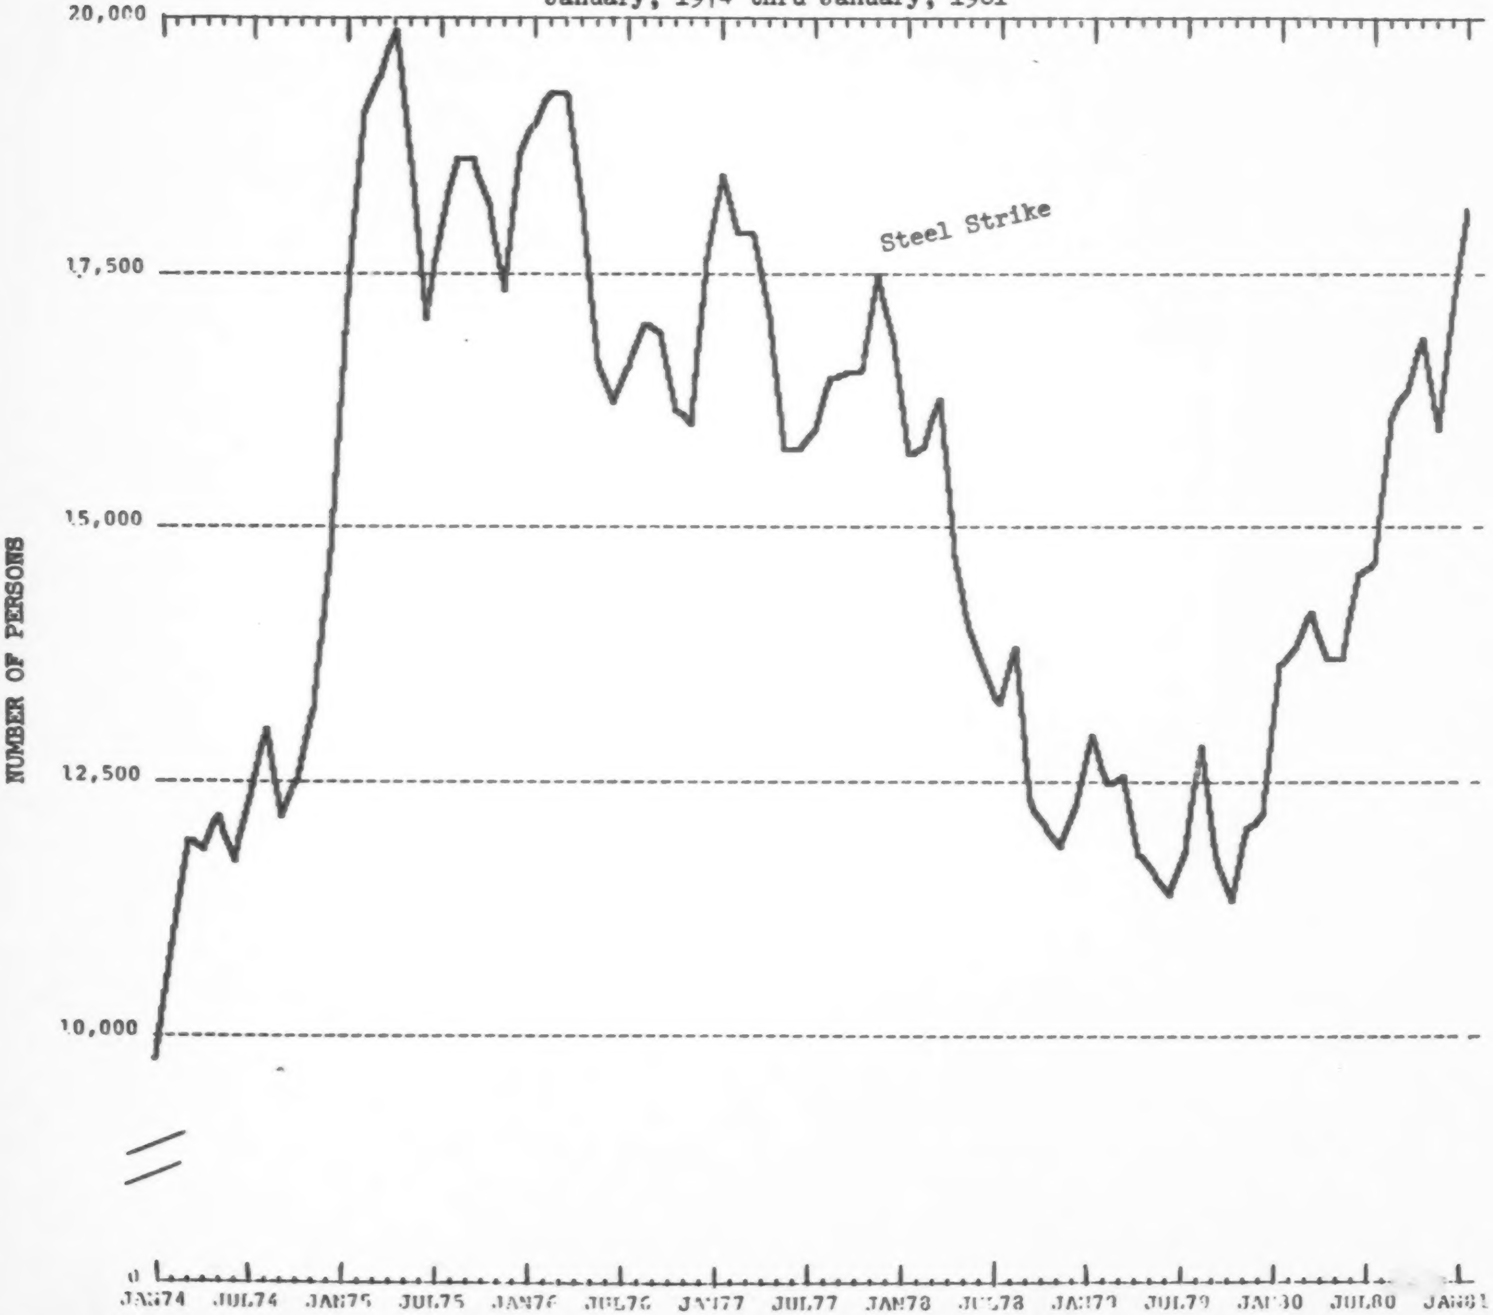
General Assistance
Total Persons and Expenditures
by Major Areas
January 1981 and Change from January 1976

	Persons Aided			Expenditures		
		Change			Change	
Area	January 1981	#	%	January 1981	#	%
Total State	18,209	- 449	- 2.4%	$2,869,428	+$944,267	+49.0%
Hennepin County	6,427	-1,833	-22.2	1,065,715	+ 259,290	+32.2
Ramsey County	3,279	- 602	-15.5	552,891	+ 2,840	+ 0.5
St. Louis County	1,838	- 24	- 1.3	292,209	+ 86,619	+42.1
Remaining Counties	6,665	+2,010	+43.2%	$ 958,613	+$595,518	+164.0%

Hennepin and Ramsey County case loads are well below the level recorded five years ago, with St. Louis County showing little change. The remaining counties' case load was up by a sizeable 43.2% over the five years. It is apparent that the current recession is having the greatest impact on the "smaller" counties.

Expenditures were up in all areas shown as the result of inflation, and the higher case load in the "outstate" counties.

MINNESOTA GENERAL ASSISTANCE
TOTAL PERSONS AIDED BY MONTH
January, 1974 thru January, 1981



In January 1981, the three large urban counties accounted for 63.4% of the statewide total of persons aided compared to 75.1% five years ago, and their share of the expenditures this year shows 66.6% compared to 81.1% five years ago.

Medical Assistance (MA) - Fewer recipients and a lower payment level characterize the MA Program during January. This decline is misleading however since the December totals were bolstered by an additional warrant cycle.

Recipients numbered 131,952 during the month. This is 24,513 (15.7%) fewer than December, 1980, but is 10,651 (8.8%) higher than one year ago.

Expenditures totalled $52,773,181 in January, $11,432,441 (17.1%) below December's level. By contrast, January's payments were $7,453,726 (16.4%) greater than January, 1980.

Expenditures for the first seven months of fiscal year 1981 total $365,928,032. This is 41,484,631 (12.8%) ahead of one year ago. The table below compares costs in the various service categories for the first seven months of fiscal year 1981 with the fiscal year 1980 distribution.

Medical Assistance Expenditure
Categories of Service Compared
First Seven Months of F.Y. 1981 vs. F.Y. 1980

Category	First Seven Months F.Y. 1981	F.Y. 1980
ICF Nursing Home	35.9%	36.9%
SNF Nursing Home	30.3	28.5
Inpatient Hospital (General)	13.1	14.0
Physician/Osteopathic Services	5.9	5.7
Prescribed Drugs	3.9	4.1
Other Services	3.5	3.1
Outpatient Hospital	2.1	2.3
Dental Services	2.1	2.0
State Institution (MI-CD)	1.5	1.8
P.T., O.T., S.T., Audiology in Nursing Home	1.7%	1.6%
Total	100.0%	100.0%

The average monthly expenditure per recipient totalled $399.94 during January. This is $10.41 (2.5%) below the December level but is $1.13 (0.3%) above the average ($398.81) for the first seven months of fiscal year 1981. Comparing the first seven months of fiscal year 1981 with the corresponding months in fiscal year 1980 indicates an increase of $8.37 (2.1%).

The table below compares the aged receiving medical assistance only during calendar years 1978, 1979 and 1980. It is noteworthy that the monthly case load in calendar year 1980 shows a more consistent pattern of advance, displaying only one decline during April and May. The two previous years showed a different pattern marked by intermittent fluctuations. Note that there has been a general upward trend since July, 1979.

__Footnotes__ - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $10,995 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Service, etc. Existing reports do not break these charges out separately.

*May not add due to rounding
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis

GLOSSARY . . . 31

February, 1981 - In Summary

All Programs - The upward trend of persons receiving maintenance assistance continued in February, totalling 180,209, 2,343 (1.3%) over January and 19,905 (12.4%) above the level a year ago. The predominant factor continues to be in the AFDC Program where utilization is still rising, primarily by families in the outstate counties.

Applications for maintenance assistance did decline in February, not only because of a fewer number of work days, but also a drop in the rate of requests for AFDC. The February rate of applications for GA remained about the same as for January.

Health care recipients were up in February, 1981, totalling 137,246 persons, 5,294 (4.0%) over January, 1981 and 21,146 (18.2%) above a year ago. The rising AFDC case load accounts primarily for both the monthly and annual trend.

February health care costs of $53,118,732 were up $345,551 (0.7%) due to inpatient hospital services, while the annual trend shows a $10,515,939 (24.7%) rise, with increases noted for most service categories.

Aid to Families with Dependent Children (AFDC) - Continuing the uninterrupted upward trend begun in December, 1979, families aided rose by 591 (1.1%). This represents an increase of 5,763 (11.7%) above February, 1980 or approximately a 1.0% month-by-month increase during the past year. Unemployed parent families account for the bulk of the case increase (71.4%), rising by 422 (11.4%). Of the total unemployed parent case increase, 50.2% were from rural counties, 31.8% from the three urban counties and the remaining 18.0% resided in the suburban counties. The rural counties now account for 38.2% of the total state UP families, compared to 22.1% in October, 1979.

Unemployed Parent Families
February, 1981 Compared to October, 1979

	February, 1981		October, 1979	
	Families	% of Total	Families	% of Total
Total State	4,136	100.0%	1,310	100.0%
Three Urban Counties	1,666	40.3%	744	56.8%
Suburban	889	21.5%	276	21.1%
Rural	1,581	38.2%	290	22.1%

Total recipients in February reached an all-time high of 149,657, of which 65.7% were children and 34.3% adults. The average number of children per family was 1.79. Adults averaged 0.93 per case. Paid recipients in February were 16,140 (12.1%) greater than in February, 1980.

Approvals were down 1,099 (30.4%) from January, 1981 and 409 (14.0%) fewer than in February, 1980. Reopened cases were 39.9% of the total approvals.

Closings declined 555 (19.3%) cases to a total of 2,321. For every case closed in February, there were 1.09 cases opened.

Net payments rose $495,717 (2.8%) above such costs for January and were $3,279,350 (22.4%) greater than expended in February, 1980. Total expenditures were $17,916,037. Gains were reported of 1.6% for regular, 11.0% for unemployed parent and 21.6% for foster care in homes. The gain in foster home care occurred in Hennepin County as a result of retroactive adjustments for prior months and an increase in foster children of 54. Payments to the unborn dropped 0.1% along with a decline of 7.7% for foster institutional care. Institutional care refers to children in homes with a capacity of 13 or more children.

The average grant per family rose to $325.38, $5.57 (1.7%) over January. Two significant factors contributing to this trend are the sharp rise of $61.22 (15.6%) in the average grant for children in foster family homes, and an increase of $3.76 (1.2%) for regular cases. The effect of these two factors offset the increase in IV-D collections of $61,076, which would have reduced the average family grant by $1.11.

Emergency Assistance (EA) - During February, this program declined along all program parameters--cases, recipients and payments. This decline is the result of 385 (15.5%) fewer AFDC recipients requiring assistance during the month.

Recipients totalled 3,548 in February, 438 (11.0%) below January's level and 604 (14.5%) less than one year ago. This month, AFDC recipients were again in the majority and represented 62.4% of all persons assisted. Total cases declined by 87 (7.4%) from February to 1,093, which is 130 (10.6%) fewer than one year ago.

February's expenditure was $268,512, a drop of $32,371 (10.8%) from January and 51,039 (16.0%) less than one year ago.

The four most common emergencies in February, Eviction from Shelter, No Employment, Utilities and Emergency Fuel together represented 61.8% of February's expenditures. Eviction from Shelter was the most prevalent emergency, representing 37.7% of the cost, followed by Utilities 9.3%, No Employment 7.9%, and Emergency Fuel 6.9%.

Minnesota Supplemental Aid (MSA) - In February, 10,411 aged, blind and disabled persons received assistance. This is 82 (0.8%) fewer than January and is 286 (2.7%) below the February, 1980 level. The January to February change occurred primarily within the Aged category, whose numbers declined by 74 (2.4%). The Disabled category also diminished but to a lesser degree, falling by only 8 (0.1%). The number of blind recipients remained unchanged from the previous month.

February's recipient decline may result from the practice of some counties to make $5.00 payments for clothing and personal needs at quarterly intervals. Since January was a payment month, February totals could be expected to be lower and they were.

Expenditures were $957,577 during the month, $684 (0.1%) higher than January and $102,424 (12.0%) above February, 1980. The February increase occurred within the Disabled category, whose expenditures rose $10,202.53 (1.4%). Ramsey County was the factor behind this change. Their new February cases (Initials), at $13,487.43, were $9,169.99 (212.4%) higher than January.

General Assistance (GA) - Application activity decreased compared to January. The number of applications received was 9.3% lower and the total applications on hand decreased by 8.4%. The number of applications disposed of decreased by 8.3% to 4,868. Of these, 4,381 (90.0%) were approved.

The total number of persons receiving GA continued to rise. There were 18,694 recipients in February 1981. This was 485 (2.7%) more than January 1981 and 4,876 (35.3%) more than February 1980. The average grant (gross dollars) per person for February 1981 was $158.32. This was $.74 (0.5%) more than January 1981 and $22.82 (16.8%) more than February 1980.

The 4,381 cases added in February brought the total cases eligible to 18,504. This was an increase of 3.8% compared to January. Payments were made for 15,777 (85.3%) of the eligible cases. There were 4,048 cases closed which left 14,456 eligible cases continued to March.

GA utilization has shown some differing trends in the various counties. In November 1980 all three county groups (see table on page 5) exhibited a decrease in recipients. This may be attributed to the lower emergency need payments in November. Following November the average grant increased only in the rural counties while the other county groups showed decreases. The statewide average grant per recipient increased in February while the urban average grant decreased. That decrease was caused by the decrease in Hennepin County's average grant from $165.82 in January to $163.32 in February. The urban figures are dominated by what happens in Hennepin County.

The Hennepin County Bureau of Social Services has taken some actions to curtail GA payments which may be at least partly the reason for some of the changes. In August--following the July 1, 1980, GA standards increase--Hennepin's average grant per recipient rose above previous months and it has remained higher since then. Since November 1980 there has been a slight but steady downward trend from $173.00 in November 1980 to $163.32 in February 1981. This downward trend began the month after the Hennepin County administration moved Emergency Social Services from Community Services to Economic Assistance. The purpose of the move was for administrative efficiency; that is, it avoids duplication of effort and facilitates coordination with other financial assistance programs. Along with the decreasing average grant, Hennepin's proportion of the state's total recipients has decreased. For Fiscal Year 1980 Hennepin had 42.2% of the total GA recipients in Minnesota. For July - October 1980 this figure was 38.7% and the November 1980 - February 1981 figure was 35.4%.

Medical Assistance (MA) - Recipients for February totalled 137,246, an increase of 5,294 (4.0%) from January and 21,146 (18.2%) more than one year ago. The February advance was the result of a higher utilization by AFDC recipients whose numbers increased 5,050 (7.1%) from the January level. AFDC recipients were also instrumental in the annual trend, as this category was 18,298 (31.8%) above one year ago and represented 86.5% of the change. A greater utilization of services also played a part in the increase. February's rate was 1.99 per recipient compared to 1.96 for January and 1.86 one year ago.

An examination of the service categories for February, 1980 and 1981 reveals that virtually all the service categories increased compared to one year ago, the only decline being State Institution MI/CD Mental Hospital, which experienced a moderate decline of 17 recipients (5.3%). The greatest numerical changes between these two months are shown in the table below.

Medical Assistance Categories of Service
Categories of Greatest Numerical Change
February, 1981 and February, 1980 Compared

Category of Service	February, 1981	February, 1980	Change Number	Change Percent
Physician/Osteopathic Service	63,501	46,210	17,292	37.4%
Prescribed Drugs	77,202	64,891	12,311	19.0%
Dental Services	18,114	11,526	6,588	57.2%
Outpatient Hospital General	18,425	12,608	5,817	46.1%
Home Health Services	2,732	1,017	1,715	168.6%
Nursing Home Skilled	17,126	15,466	1,660	10.7%
Inpatient Hospital	5,707	4,078	1,629	39.9%
Nursing Home ICF-I	12,848	11,543	1,305	11.3%
Family Planning Service	5,118	3,834	1,284	33.5%
Medical Supplies	6,548	5,588	960	17.2%
Ambulance Service/Medical Transportation	3,432	2,480	952	38.4%
Mental Health Services	1,553	650	903	138.9%
EPSDT	1,301	451	850	188.5%
Independent Lab/X-Ray	1,466	618	848	137.2%
Public Health Clinic Services	2,267	1,468	799	54.4%

Expenditures totalled $53,118,732 during the month. This is $345,551 (0.7%) greater than January, 1981 and is $10,515,939 above one year ago. The monthly change is directly related to a $712,986 (11.1%) increase in Inpatient Hospital (General) costs.

The graph below provides perspective about the distribution of MA recipients and expenditures during C.Y. 1980. It is a visual reminder that the largest service populations are not necessarily those of highest cost--age and health are the major factors behind expenditure levels.

Footnotes - Medical Assistance Recipients and Expenditures By Category of Service

(1) This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2) Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3) An additional $7,135 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/ Osteopathic Service, etc. Existing reports do not break these charges out separately.

***May not add due to rounding.**

****Includes Lincoln, Lyon and Murray Counties.**

**** Includes Faribault, Martin and Watonwan Counties.**

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

VI. Medical Assistance: Recipients Receiving Medical Assistance Only - March, 1981 29-30

VII. Supplemental Security Income and Supplemental Aid by County - March, 1981 31-32

TECHNICAL NOTES 33

GLOSSARY 34

March, 1981 - In Summary

All Programs - Local agencies received 10,584 applications for maintenance assistance (AFDC and General Assistance) in March, 1981, a record high for a March month. This total was 39.1% above February, 1981 (a shorter work month), and 37.8% over the March, 1980 figure. Need for financial assistance usually peaks in March, especially in General Assistance as unemployment rises in the winter months, but this year it is higher because of the economic recession. Applications received and those approved during March, 1981 are compared with a year ago in the following table:

Application Activity	March, 1981	Change from March, 1980 #	Change from March, 1980 %
AFDC Applications Received	4,818	+1,587	+49.1%
AFDC Applications Approved	4,023	+1,418	+54.4%
GA Applications Received	5,766	+1,317	+29.6%
GA Applications Approved	5,223	+1,138	+27.9%

Persons receiving maintenance assistance totalled 182,769 in March, 1981, 2,560 (1.4%) above February and 21,549 (12.6%) over the level a year ago. The relative increase is greatest in the General Assistance Program. Maintenance expenditures of $22,074,662 in March was $27,092 below (-0.1%) February, but $4,525,346 (25.8%) over March, 1980.

Health care applications (Medical Assistance) were also up in March, with 4,782 requests received. This was 564 (13.4%) over February, 1981 and 1,571 (48.9%) above March, 1980.

Medical Assistance expenditures dropped in March as a result of lower long-term care costs, reflecting payments for only 28 days in the month of February. March MA payments of $50,088,859 were $3,029,873 (-5.7%) below February but $4,203,672 (9.2%) over March, 1980.

Aid to Families with Dependent Children (AFDC) - March's expenditures for AFDC declined from $17,916,037 in February, 1981 to $17,662,085, a difference of $253,952 (1.4%). This occurred despite an increase of 503 (0.9%) cases receiving assistance.

March's maintenance costs were reduced because support collections from responsible fathers were $424,816 (30.2%) higher than February. Total IV-D collections in March were $1,833,004.

The AFDC Program, in terms of cases and persons served, continued to advance, perpetuating the trend which began in late calendar year 1979.

The AFDC Program has grown dramatically over the past year. This can be observed by comparing the third quarters of fiscal year 1981 and 1980. Between these two periods, cases increased by 5,841 (11.9%), persons by 16,381 (12.3%) and expenditures by $9,746,022 (22.5%). (See table on page 3.)

Increases occurred in all segments of the AFDC Program. Unemployed parents showed the highest rate of increase, rising 2,188 (116.4%) in cases and $3,021,428 (129.4%) in costs. The rural counties led the pace, exhibiting a gain in unemployed parent cases of 179.6%, followed by the suburban counties with a 115.4% advance and lastly by three urban counties reporting an increase of 78.6%. Of the 71 rural counties, six (Beltrami, Carlton, Cass, Crow Wing, Itasca and Pine) contained 37.5% of the total rural unemployed parent cases. Crow Wing reported the largest number of unemployed parent cases (399) followed by Itasca with 330. Within the suburban counties, 26.1% of the unemployed parent cases resided in Anoka County. The urban county of St. Louis unemployed parent case count was 123.9% greater in the third quarter of fiscal year 1981 than in the same quarter one year ago. It is noted that the six mentioned rural counties plus St. Louis County are geographically contiguous, all in the northeast and northcentral region of the state. Aitkin County, which lies within this area, also reported a sudden increase in unemployed parents, rising from an average of four to 38 per month.

Foster care in institutions, although small in numbers of cases, displayed an increase of 33.3% after several years of declining utilization. Here again, the rural counties' rate of increase was the highest, increasing 41.6%. No particular reason for the rise is evident other than more counties are utilizing this type of care. The suburban counties rose 38.2% and the urban counties 26.7%.

The Unborn Concurrent and the Unborn Only categories reflected increases of 28.7% and 17.1% respectively. Gains were reported in all county areas with the urban total surpassing the suburban and rural. The following table shows the percentage change in the Unborn Concurrent and the Unborn Only segments for the January to March, 1981 quarter when compared with the corresponding months in fiscal year 1980.

	Unborn Concurrent	Unborn Only
Urban	+36.0%	+22.2%
Hennepin	+48.4%	+28.7%
Ramsey	- 1.3%	+11.4%
St. Louis	+48.6%	+22.3%
Suburban	+15.0%	+ 6.5%
Rural	+24.2%	+16.0%

Statewide, regular cases receiving assistance increased 7.6%, with the suburban and rural counties each advancing by 12.1%. By contrast, the urban counties' regular case load rose only 3.7%. Of the urban counties, Hennepin County's growth was the lowest at 2.5%. It is interesting to note that in the January to March quarter of 1981, the total regular payment cases for Hennepin County was 1.8% greater than the total of the 71 rural counties.

Foster care cases in homes remained relatively stable, increasing only 0.8%. However, payments for this care rose $261,056 (22.4%), from $1,167,194 to $1,428,250.

AFDC
Third Quarter Comparisons
Families, Persons and Payments
in Fiscal Years 1980 and 1981

	Monthly Average Families January - March			Monthly Average Persons January - March			Total Payments January - March

Unborn Only	1,341	1,145	+ 196 (17.1%)	2,638	2,213	+ 425 (19.2%)	1,350,248	1,014,863	+ 335,385 (33.0%)
Unborn Concurrent	731	568	+ 163 (28.7%)	731	568	+ 163 (28.7%)	$ 196,085	$ 146,414	+$ 49,671 (33.9%)

Approvals for March, 1981 totalled 4,367, of which 2,163 (49.5%) were new, 1,860 (42.6%) were reopened and 344 (7.9% were transfers between counties. Of the total approvals, 42.5% were urban, 26.8% were suburban and 30.7% were rural.

Closings numbered 3,243. For every case closed, there were 1.35 cases opened.

Emergency Assistance (EA) - This assistance program displayed an across-the-board advance during March. AFDC families receiving EA were 23 (3.4%) more than in February while the non-AFDC segment remained relatively stable. Total EA families numbered 1,118 or 25 (2.3%) more than the previous month.

EA recipients numbered 3,672 in March, 124 (3.5%) more than February and 276 (7.0%) below March, 1980. Once again, AFDC recipients were the most prevalent, representing 58.7% of those receiving assistance. One year ago, however, they were the minority and accounted for 48.3% of total recipients. AFDC families generally are smaller than non-AFDC families. The average size of AFDC families during March was 3.05 compared to 3.68 for the non-AFDC group.

March's expenditure totalled $305,996, an advance of $37,484 (14.0%) from February and $10,874 (3.7%) more than one year ago.

The most common emergencies this month were Eviction from Shelter, Utilities, No Employment and Emergency Fuel. Together they accounted for 61.9% of March's expenditures. Eviction or the threat of eviction was by far the predominant crisis. It involved 335 families in March and represented 37.6% of total expenditures. The next highest expenditures were recorded by Utilities 10.9%, No Employment 7.0% and Emergency Fuel 6.5%.

The emergency Eviction from Shelter is the focus of the table below. Displaying this emergency during March, by county categories, the table reveals this as an urban phenomenon. Thus, the individual urban counties are shown, too. It is noteworthy that Hennepin County in March represented 75.7% of the "AFDC-related" expenditures, 61.4% of the non-AFDC payments and 70.1% of the total payments for this emergency.

Emergency Assistance
Eviction from Shelter
March, 1981

Type of Counties	AFDC Cases	AFDC Persons	AFDC Payments	Non-AFDC Cases	Non-AFDC Persons	Non-AFDC Payments
Urban	173	483	$54,991.23	68	226	$30,610.77
Hennepin	165	456	53,158.45	61	200	27,424.77
Ramsey	7	21	1,597.78	6	21	2,436.00
St. Louis	1	6	235.00	1	5	750.00
Suburban	22	80	9,456.85	23	81	8,656.36
Rural	26	91	$ 5,801.82	23	82	$ 5,396.87
Total	221	654	$70,249.90	114	389	$44,664.00

Emergency Fuel assistance totalled $19,804, an increase of $1,211 (6.5%) from February.

Since the beginning of the 1980-81 heating season in October, 1980, $112,612 has been expended for fuel by the county agencies. These expenditures represent 5.7% of the EA payments within this six-month period. This assistance category is shown in the table below.

Emergency Fuel Assistance
by Month

	Families	Recipients	Expenditures
October, 1980	70	261	$ 15,071
November	106	412	22,143
December	103	415	22,892
January, 1981	68	265	14,109
February	80	295	18,593
March	77	282	19,804
Total Cumulative	504	1,930	$112,612
Monthly Average	84	322	$ 18,769

Minnesota Supplemental Aid (MSA) - In March, 10,401 aged, blind and disabled persons received assistance. This was 10 (0.1%) below February but 319 (3.0%) below March, 1980.

Expenditures reached $962,033, the highest monthly total in this program's history. This increase resulted from a $7,360.57 advance within the Disabled category which was partially checked by a $3,331.90 decline in costs for the aged.

The aged numbered 3,058 in March, 7 (0.2%) fewer than the previous month. This resulted in an average monthly payment of $65.99, $0.94 (1.4%) lower than February.

The expenditure for the blind totalled $13,200 for 163 recipients for an average of $80.98. The expenditure average is $1.10 (1.4%) higher than February while recipients advanced by 3 (1.9%).

The number of disabled totalled 7,180 during March, 6 (0.1%) more than February. Expenditures, at $747,027, were $7,361 (1.0%) greater than the previous month. The average grant within this category was $104.04, $1.11 (1.1%) more than February.

General Assistance (GA) - The total number of persons receiving GA for March, 1981, was 19,444. This was 750 (4.0%) more than February, 1981, and 5,286 (37.3%) more than March, 1980. The average grant (gross dollars) per person for March, 1981, was $161.72. This was $3.40 (2.1%) more than February, 1981, and $24.28 (17.7%) more than March, 1980.

Application activity increased compared to February. The number of applications received was 19.6% higher and the total applications on hand increased by 16.8%. The number of applications disposed of increased by 18.8% to 5,784. Of these, 5,223 (90.3%) were approved.

The 5,223 cases added in March brought the total cases eligible to 19,679. This was an increase of 6.3% compared to February. Payments were made for 15,824 (80.4%) of the eligible cases. There were 4,693 cases closed which left 14,986 eligible cases continued to April.

Medical Assistance (MA) - In this month, 134,186 persons received medical aid, 3,060 (2.2%) fewer than February. Payments during the month totalled $50,088,859, which resulted in an average cost of $373.28 per person.

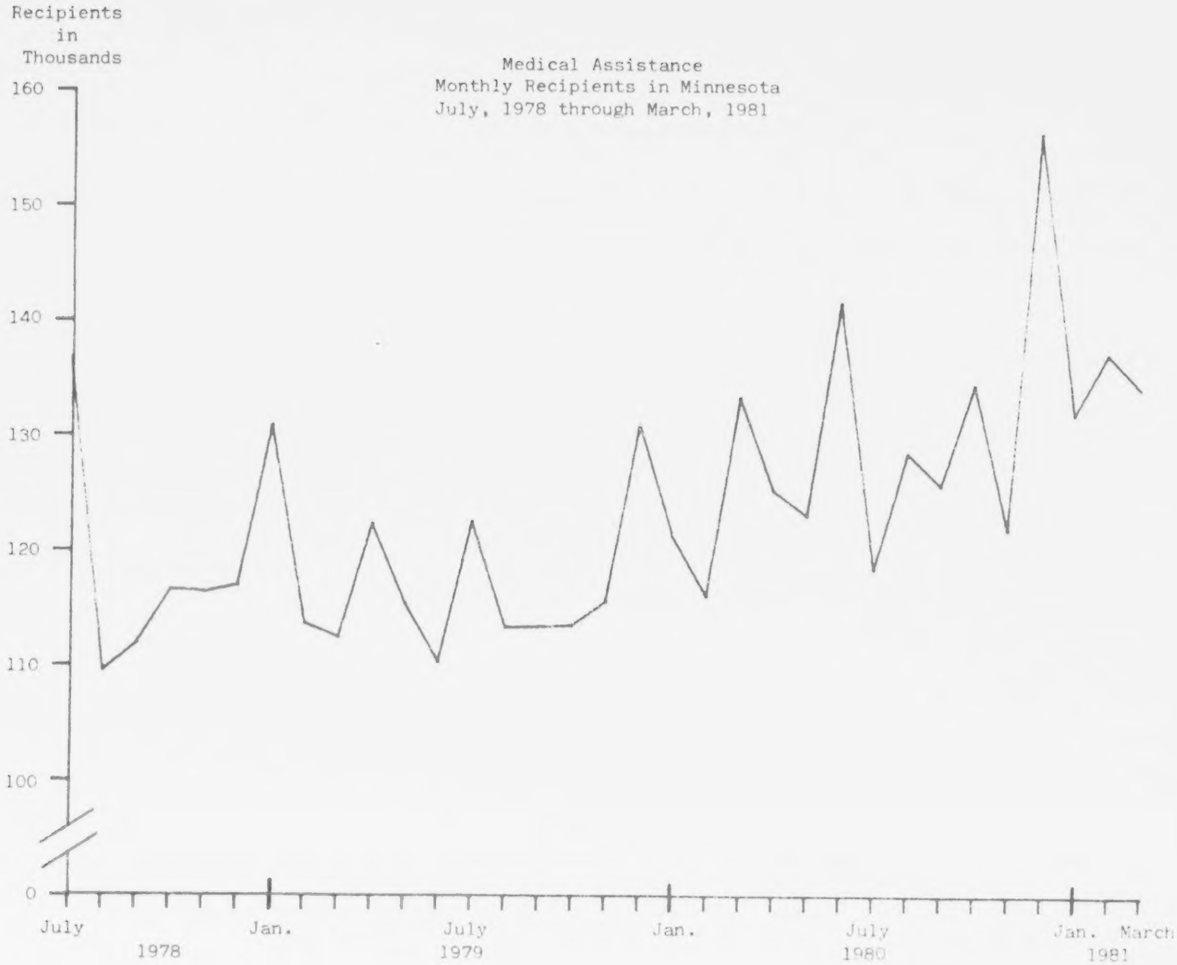
The average recipient count over the first three quarters of fiscal year 1981 totalled 132,109, which is 2,077 (1.5%) less than the March count, but 9,584 (7.8%) ahead of the monthly average for fiscal year 1980.

The average monthly expenditure over this same period was $52,126,180, which is $2,037,321 (4.1%) higher than March and $4,928,770 (10.4%) more than the fiscal year 1980 average.

The recipient decline was the result of lower AFDC utilization during March. AFDC recipients requiring medical services numbered 72,219 during the month, 3,601 (4.7%) fewer than February. The other recipient categories reflected only minor changes.

There were 32,270 persons residing in nursing homes during the month (not including residents in state hospitals for the mentally retarded). Of this number, 15,701 (48.7%) were residents of intensive care (skilled) facilities while 16,569 (51.3%) received intermediate care. Nursing home costs were $27,096,365 in March, 54.1% of the total medical cost. The average expenditure per nursing home recipient was $839.68 during the month.

The graph which follows shows the number of recipients receiving medical assistance from July, 1979 through March, 1981. Although a pattern of fluctuation is evident, the underlying theme is one of moderate increase. This increase can be attributed to AFDC recipients whose numbers have risen markedly during this period. Also, advances in the number of recipients requiring nursing homes has been a factor, too. The average monthly recipient total was 117,761 in fiscal year 1979, 122,524 in fiscal year 1980 and 132,109 for the first nine months of fiscal year 1981.



Medical Assistance
Monthly Recipients in Minnesota
July, 1978 through March, 1981

Medical Assistance - 10-Year Expenditure Trend - Calendar Years 1970 and 1980

Health care expenditures through the Medical Assistance Program (Title XIX) were over five times as high in calendar year 1980 compared to calendar year 1970. The factors accounting for this growth were presented in the Summary of Minnesota Public Assistance Trends for February, 1980. The analysis presented in this summary shows county trends and utilizes the 1980 census data to show the effect of general population trends on total MA expenditures.

County Trends - There was a wide range in the relative growth in costs, from a 249.7% increase in Clearwater County to a 878.9% rise in Dakota County. The effect of population changes on this range shows Cook County with the smallest relative increase in per capita cost at 319.8% and Norman County the highest at a 697.3% rise in per capita cost. Cook County recorded an increase of 19.5% in population in the 10-year period, while Norman County had a loss of 6.3% in population.

Dakota County maintained its ranking in the amount of MA dollars spent on a per capita basis. It was the lowest county in both years. Relative population growth in Dakota was the third highest in the state at 38.8%, which was an important factor in the large increase in MA costs.

Clearwater County had the highest per capita MA costs in 1970, but dropped to second place in 1980 as Kittson County took over the number one position. A population decline in Kittson County contributed to the jump from 15th highest in 1970 to number one in 1980.

The top 10 counties and the lowest 10 counties in per capita costs for both years are presented below:

Top 10

1970		1980	
County	$	County	$
Clearwater	$76.50	Kittson	$268.96
Mahnomen	66.99	Clearwater	244.63
Aitkin	59.16	Wilkin	232.10
Cass	53.45	Pine	226.21
Cook	51.77	Norman	222.36
Pine	51.71	Cass	210.18
Mille Lacs	48.68	Mahnomen	205.60
Koochiching	45.96	Traverse	205.33
St. Louis	45.95	Todd	201.68
Morrison	45.52	Aitkin	199.90

Lowest 10

1970		1980	
County	$	County	$
Nobles	$16.69	Wright	$98.85
Carver	16.32	Sherburne	97.45
Watonwan	15.79	Lake	96.29
Clay	14.57	Olmsted	94.76
Washington	14.40	Nicollet	93.55
Rock	14.31	Rock	91.59
Steele	14.06	Carver	83.51
Lake	13.19	Washington	76.61
Anoka	10.98	Anoka	70.10
Dakota	9.82	Dakota	69.22

Of the three large urban counties, Hennepin and Ramsey recorded losses in population and, accordingly, their relative increase in per capita expenditures was larger than the relative rise in actual costs. Hennepin recorded the largest increase in MA expenditures over the 10 years, but still shows the lowest per capita expenditures while St. Louis County continues to have the highest per capita cost (of the three counties).

---

[1] This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

[2] Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

[3] An additional $10,503 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.

TECHNICAL NOTES 27

GLOSSARY 28

April, 1981 - In Summary

All Programs - Persons receiving maintenance assistance increased in April as a result of a peak case load in AFDC, which recorded its 17th consecutive monthly rise. Total maintenance persons aided in April was 183,668, 899 (+0.5%) above March and 22,786 (+14.2%) above a year ago. The GA Program recorded a seasonal decline in April, partially offsetting the AFDC trend, and it is noted that applications for aid received in April for AFDC and GA combined declined substantially (by 19.6%), indicating a change in direction in subsequent months for the total maintenance case load. Last year (1980), the March - April trend in applications received showed a slight increase.

Maintenance expenditures reached $22,238,234 in April, $163,572 (+0.7%) above March and $4,683,822 (+26.7%) above a year ago. Higher standards of assistance as well as higher case loads contributed to the annual trend.

Persons receiving medical allowances in April, 1981 increased by 1.5% to 136,234. Most of this trend represents additional persons from AFDC families. Costs were up much more, by 11.3% however, as rate adjustments were processed for nursing homes and inpatient hospital care costs also increased by 26.5% in April. The April medical bill was $55,738,666, $5,649,807 (+11.3%) over March, and $7,027,306 (+14.4%) over the level a year ago.

Aid to Families with Dependent Children (AFDC) - Cases receiving payment reached an all-time high of 56,011, marking the 17th month of successive increases. The case increase was 446 (0.8%) higher than in March, 1981 and 6,168 (12.3%) above April, 1980. Significant increases occurred within the regular and unemployed segments with each rising 253 (0.5%) and 179 (4.1%) respectively. Unemployed parents have risen an average of 276 cases per month since November, 1980, or an increase of 43.7% over the five-month period. The unemployed parent case count stands at 4,530 in April, 1981. Percentagewise, total cases increased 0.8% within the three urban counties, 1.0% within the suburban counties and 0.6% within the rural counties.

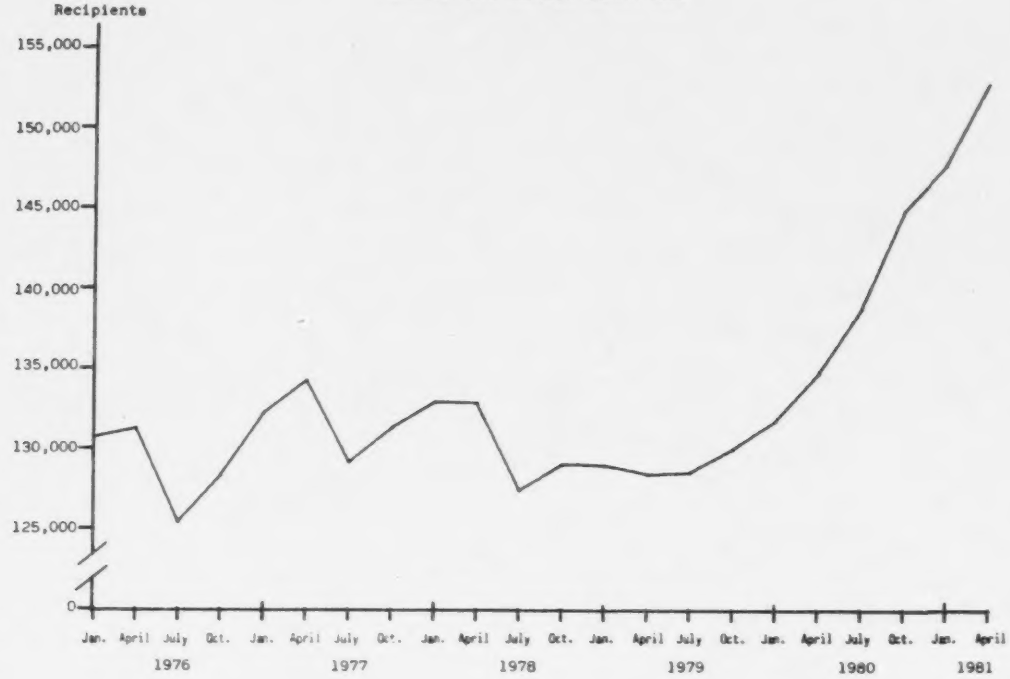
Net payments also were at an all-time high of $17,877,980, reflecting a 1.2% increase from March, 1981 and a growth of 23.0% since April, 1980. In addition, $1,614,427 was collected from responsible parents.

Approvals, demonstrating a sporadic pace in February and March, returned to a normal trend in April. April approvals totalled 3,285, breaking down into 1,545 (47.0%) new, 1,464 (44.5%) reopened and 276 (8.5%) transfers between counties. The highest approval activity occurred within the suburban counties. As per example, for every 11.4 cases receiving assistance in the suburban counties, there was one approval compared with one approval for every 16.6 cases in the rural counties and one approval for every 21.8 cases in the urban counties.

Closings decreased 158 (4.9%) cases below March, 1981. For every case closed, there were 1.06 openings.

The graph which follows shows the growth in AFDC recipients since January, 1976. From 1976 through the first half of 1979, recipient numbers were relatively stable. However, in July, 1979 through the present, the program has advanced approximately 25,000 recipients to 152,775.

AFDC Recipients in Minnesota
at Quarterly Intervals*
January, 1976 through April, 1981



Emergency Assistance (EA) - Greater activity in the category of Utilities caused this program to advance during April. This happened because needy families were trying to clean up outstanding bills which accumulated through the winter season. They were prompted by impending electrical cutoff, which could legally occur after April 1.

There were 4,293 recipients served by Emergency Assistance. This is 621 (16.9%) more than March and 508 (13.4%) higher than one year ago.

Cases numbered 1,264, 146 (13.1%) fewer than March. By contrast, EA in April, 1980 served 1,126 families, 12.3% less.

Costs incurred by the county agencies totalled $346,297. This was $40,301 (13.2%) above the March level and $47,482 (15.9%) more than one year ago.

The two major emergencies during the month were Utilities and Eviction from Shelter. Eviction, usually seen in first place, slipped to second, representing only 23.4% of expenditures. By comparison, Utilities, which represent 10.9% of costs in March, advanced to 42.5% in April. This increase, while not occurring last year, is not without precedent for it follows closely the performance of March and April, 1979.

The following table shows the changes in Utility costs between March and April, 1981. As can be seen, this advance occurred in all county categories. The highest category was predictably the urban counties, which had an overall increase of 457.1% from the previous month. Hennepin County increased an astounding 1,663.5% in this one-month period.

Utility Emergency
by County Category
March and April, 1981 Compared

Category	Cases April	Cases March	Change #	Change %	Payments April	Payments March	Change #	Change %
Urban	319	72	247	343.1%	$113,334	$20,343	$ 92,991	457.1%

St. Louis	21	10	11	110.0%	5,311	2,275	3,036	133.5%
Suburban	91	40	51	127.5%	23,540	8,677	14,863	171.3%
Rural	45	30	15	50.0%	$ 10,358	$ 4,276	$ 6,082	142.2%
Total	455	142	313	220.4%	$147,232	$33,296	$113,936	342.2%

April's emergency fuel assistance totalled $17,417, a decline of 2,387 (12.1%) from March.

Minnesota Supplemental Aid (MSA) - In April, 10,450 persons were served by this program. This is 49 (0.5%) more than March but 194 (1.8%) less than one year ago. Expenditures by contrast subsided to $951,031 during the month, $10,993 (1.1%) below March and $117,827 (14.1%) above one year ago.

The average April grant totalled $91.01, the fourth consecutive month that the $90.00 level has been exceeded. The major contributor to this cost is the Disabled segment, which averaged $100.61 per recipient during the month.

The advance in April's case load occurred in Itasca (+9), Mower (+5), Nicollet (+4), Ramsey (+8), St. Louis (+3) and Waseca (+18). Of these changes, 60% occurred in the Aged category. Waseca County's increase is the result of their practice of making $5.00 payments for clothing and personal needs to boarding home residents at quarterly intervals.

The decline in expenditures is attributable to Hennepin and Ramsey Counties. Hennepin experienced a $32,232 (12.3%) reduction in Disabled costs while Ramsey fell $6,068.75 (48.6%) within the Aged category. This was partially offset by St. Louis County, whose costs increased $16,430 from March, $11,749 of which was within the Aged category. The rural counties displayed a slight advance, but were unable to offset the overall reductions in costs experienced in the urban counties.

General Assistance (GA) - The total number of persons receiving GA for April, 1981, was 19,003, 441 (2.3%) less than the peak level in March, 1981. This trend is comparable to the March - April change in 1980, and reflects the seasonal improvement in employment. The annual trend in persons aided shows April, 1981, 5,306 (38.7%) above the level a year ago.

GA expenditures of $3,062,926 in April were 2.6% below March, and compared to 1980 continues to show a substantial rise (+61.3%). The annual trend resulted from the higher case load (+38.7%) and a higher grant level (+16.3%).

Application activity decreased compared to March. The number of applications received was 15.3% lower and the total applications on hand decreased by 14.4%. The number of applications disposed of decreased by 15.2% to 4,905. Of these, 4,317 (88.0%) were approved.

Medical Assistance (MA) - The program recorded increases in recipients and expenditures during April. The recipient increase was the result of greater AFDC utilization while expenditures were advanced by the Aged (MA - Only) group.

The recipient count increased by 2,048 (1.5%) from March and is 11,011 (8.8%) higher than one year ago. Compared to the fiscal year to date average, April is 3,712 recipients (2.8%) higher.

April's payments were $5,649,807 (11.3%) higher than the previous month and $7,027,306 (14.4%) greater than one year ago. This month's expenditures were $3,251,237 (6.2%) ahead of the fiscal year to date average.

Long-Term Care and Program Expenses

The cost of long-term care has been the major component of the Medical Assistance Program since its inception in 1966. Prior to 1966, long-term care was a major cost factor, representing 50% of the cost, while hospitalization was in second place with 28%. When Medicare assumed hospital costs for the aged (co-insurance excluded) in 1966, long-term care assumed a much larger share of the medical dollar. This proportion continues to grow.

In recent years, data has become available to show other medical care provided to nursing home residents, i.e.; physical therapy, physician services, etc. This enables total nursing home costs to be computed. In 1980, long-term care residents actually accounted for 72.4% of the total MA dollar rather than 65.5%, as would be determined by noting long-term care alone. The following table shows MA expenditures, particularly long-term care and ancillary services, for the period of calendar year 1976 through 1980.

Medical Assistance Expenditures
Total Program, Long-Term Care*, and Ancillary Services
Calendar Years 1976 - 1980

	Expenditures (000 omitted)					
Year	Total	Long-Term Care	%	Ancillary Services	%	Combined Percentage
1976	$328,277	$191,696	58.4%	$19,339	5.9%	64.3%
1977	394,821	246,107	62.3%	22,347	5.7%	68.0%
1978	438,269	276,509	63.1%	28,779	6.6%	69.7%
1979	518,568	336,743	64.9%	35,494	6.8%	71.7%
1980	$600,400	$393,203	65.5%	$41,385	6.9%	72.4%

*Skilled nursing care, Intermediate Care Facilities (ICF) I & II, ICF - Mentally Retarded (MR), Institutional MR.

The cost of ancillary services shows consistent increases each year. This has resulted from greater utilization by nursing home residents and from higher average payments as well.

TOTAL	136,234	$55,738,666	$ 524,874,289

(1)This table represents state Medicaid system payments plus payments made by counties to primarily medical vendors not covered by the central payments system. Also, in this table, each person is counted under all service categories for which payment is made in his/her behalf during the month.

(2)Recipient recoveries represent collections such as estate settlements, tort recoveries, etc. ... generally third party collections which cannot be tied directly to a specific service billing. The dollar values under this category are always negative.

(3)An additional $14,459 was paid out for EPSDT services during the month; however, these charges were billed in a different fashion and are included under other service types such as Public Health Clinic, Physician/Osteopathic Services, etc. Existing reports do not break these charges out separately.

*May not add due to rounding.
**Includes Lincoln, Lyon and Murray Counties.
***Includes Faribault, Martin and Watonwan Counties.

TECHNICAL NOTES

Table I	Application activity for the AFDC Program does not include applications for medical only needs.
Table II	Under MA, total Persons Concurrently Receiving AFDC are not included when calculating the total number of persons receiving assistance. This is done to unduplicate the total count since these people are already counted under the AFDC Program.
Table III	This table does not include cases and payments made under the Emergency Assistance Program.
Table IV	The SMSA total includes the urban total. Two multi-county agencies are labelled as follows: F-M-W HSB includes Faribault, Martin and Watonwan Counties; Region VIII North includes Lincoln, Lyon and Murray Counties.
Tables V & VI	Medical Assistance - The program is broken into two components: (1) Those recipients who had a vendor payment made in their behalf and are not concurrently receiving a money payment (the MA-Only group). (2) Those recipients who are concurrently receiving a money payment (AFDC, SSI, MSA) and a medical vendor payment was also made in their behalf. The counts are of people in whose behalf a payment was made out of the State's Centralized Medical Payments System during the month specified.

GLOSSARY

AFDC-UB	AFDC UB . . . An unborn child is included under the definition of child in the AFDC Program and grants are determined accordingly. For this reason, we have counted them as recipients. It is possible for a case which is currently receiving money under another subprogram (such as Unemployed Father or Regular AFDC) to receive an additional amount due to the presence of an unborn child. In instances such as this, the unborn will appear in the child count, but there will be no case or caretaker count since they are carried under the other subprogram.
EPSDT	Early Periodic Screening and Diagnostic Treatment
GAMC	General Assistance Medical Care
HMO	Health Maintenance Organization
Nursing Home ICF-I	Intermediate Care Facility (High Care)
ICF-II	Intermediate Care Facility (Minimum Care)
ICF-MR	Intermediate Care Facility (Mentally Retarded)
OAA-CCR	Old Age Assistance Concurrently Receiving Supplemental Security Income
OAA-MAO	Old Age Assistance, Medical Assistance Only
P.T., O.T., S.T. Audiology in Nursing Home	Physical Therapy, Occupational Therapy, Speech Therapy
Podiatrist Service	Specializing in Foot Care Services
State Institution MR (ICF)	Mentally Retarded, Intermediate Care Facility
SMSA	Standard Metropolitan Statistical Area is a county or a group of contiguous counties which contain at least one city of 50,000 population. In addition to the county of counties containing such cities, contiguous counties are included in such areas if they are essentially metropolitan in character and are socially and economically integrated.
TB	Tuberculosis
